FIRST STEP TAKEN BY FRANCE TO ISOLATE RUHR COMPLETELY; PASSIVITY POLICY TO CONTINUE

Allied Action to Starve Out Germany Refuses to "Negotiate Germany-Other Coercive Measures Threatened

By SISLEY HUDDLESTON By Special Cable

ometal notice was given last high and orders were issued immediately. The announcement said that Mr. This is an extremely severe step, which it is contended Germany has provoked.

This is an extremely severe step, which it is contended Germany has provoked.

It means that unless Germany can that Germany will be starved out. It other measures will follow if Germany remains obdurate, but it is difficult to conceive anything worse which

Complete Isolation Intended

This is described as only a preliminary move in the separation of the whole Ruhr valley from the Reich. It is intimated that other articles than gotiate under bayonets"; second, that tier, controlled by the French. But in reality, nothing that can be stopped will have such an influence on the economic life of the rest of Germany prohibited. It is one of France's last cards. Here, there appears to be a doubt, however, that Germany has been laying in certain stocks, and has been buying quantities from England and elsewhere. The French blow is not unexpected. The chances are that Germany can hold out for a certain chief problem is whether France will go on much longer, be-lieving that something will come to her out of this Ruhr adventure. As now seen by an impartial observer nothing of advantage can happen for

Two Possibilities for Germany According to this observer there are roughly two possibilties. The first possibility is Germany's surrender: the second possibility is Germany's collapse. Its collapse probably means. not only the utter route of the mark, but social upheaval, perhaps revolution. My informant is much better qualified to express an opinion on the real life of Germany, than correspondents who live in hotel palaces fering throughout Germany, and perand barely speak the language.

families are literally unable to pro- would be well calculated to disturb this improvement to prohibiton ensist on such diet as beet-root and he gave me a number of similar examples.

The German people are, however, strongly disciplined. They will never reparation installment was now due, and asked if payment had revolt except in the last extremity. revolt except in the last extremity. been made. "It has not been paid," Had the German people had the charthee Chancellor replied. acter of the Irish, for example, things would long ago have been very dif-ferent. If a collapse really comes, even a German revolution of a serious character is probable. In the circumstances which may be foreseen there certainly will not be room for the collection of reparations.

Chances of Getting Reparations

But if, on the other hand, Germany, capitulates before final ruin comes, are France's prospects of obtaining repa-

in the most astronomical figures. The surrender of Germany therefore means only new promises, which it is less possible for the country to keep than ever. In either event therefore, reparations are beginning to disappear entirely from the considerations. Ruhr enterprise, as a means of pressure has not yet been effective, and when it is it may be too late.

Adventure Is Expensive

As a means of raising revenue, it is obviously a failure and will prove to be more expensive than admitted by the French Government. Troops in garrisons on a peace footing are paid less and cost less than when on active service. Whatever happens, however, France is bound to see the business through. There is little chance of the

as possible, the French, therefore, are tightening the screw. They will shoot on Germany's sons committing sabotage; they will expell persons not immediately obeying their orders; new currency will be introduced later, and the customs offices worked all along

TERMS OF TREATY TO TURKS A COMPLETE CAPITULATION ON PART OF ALLIED POWERS

Consequences of Compact Resulting From Anglo-French Rivalry in Levant Said to Be Incalculable—Problem May Yet Be Fought Out on Battlefield

By CRAWFURD PRICE

LONDON, Feb. 1-The terms of the draft treaty submitted to the Turks yesterday represent an almost complete capitulation by Great Britain, France, Italy, Jugoslavia, Rumania, and Greece to the demands formulated by a small Moslem state of some 7,000,000 inhabitants.

Anglo-French rivalry in the Levant. Its consequences are incalculable, but it may be said with certainty that the great war has left the vexed Eastern question still unanswered. And that in the present state of the European mentality means the problem may yet be fought out again on the battle. be fought out again on the battle

Angora assembly and it is beyond the wit of the western mind to foresee the attitude that body will adopt.

If they consider the terms logically the Turks are bound to admit the Allies have conceded more than they have any right to expect, offered concessions they have never dared demand even before the Ottoman Empire entered the great war on the wrong side and suffered military disaster. So far indeed have the Allies gone that the essentials of the settlement practically agree with the national pact. Presuming Turkey's claim for a pleb-Presuming Turkey's claim for a pleb-iscite in Western Thrace is untenable, the European frontiers have been agreed to, with the exception of the desire for Karagatch—at present the station for Adrianople, which lies on the right bank of the Maritza. On the Asiatic side there is no question, save that concerning the Vilayet of Mosul, which it is proposed to submit to the

concedes the Ottoman viewpoint, with the exception probably of an unwork-able proposal for the passage of neu-tral warables when Turkey is at war —unworkable because the Strafts would then be mised and no traffic could pass.

Georgi Tchitcherin, Soviet Foreign Minister, in a special session of the Near East Conference devoted to the Straits question, today refused to accept the allied proposals and declared that he would never consent to them until the demands of Russia were satisfied.

The forces which lead to passe described the interest of the Minister of the City of the Minister of the Minister of the City of the Minister of the City of the Minister of the City of the Minister of the Mi Minister, in a special session of the ing made to remedy the damage al-ready done. Organizations have been has agreed, however, to make itself scribed by Richard Washburn Child, ing the attachment of foreign legislaattempting reforestation in a few responsible for the enormous annual the American observer, as irresistible, tive councillors to Turkish courts. scattered areas, but it is realized that payment in dollars which the interest unless met by utter recklessness have Financially, foreigners are placed on any program, to be effective, must be on the American debt represents, a been very active in the last 24 hours an equal footing with nationals. The adopted on a national scale and must new incentive comes into operation and appear to have made appreciable indemnity payable as a result of the

course of the Great War, British holdings in American securities were sold to pay for munitions upon so large a scale that—quite apart from interneaccepted out of hand by any reasonable body of men, but in addition the Turks will be the first to recognize £ 40,000,000 annually in its relations ful appeals that he accept were made the necessity of paying something to with the United States. In other by allied spokesmen, Mr. Child, and get the British forces out of Turkish words, instead of remaining possessed by the representatives of Rumania, largely of vaguely-worded doctrines and the only specific infringement of its stipulations is the refusal of plebiscites in western Thrace and Arab territories and the temporary indicial and financial restrictions suf-

in history. Its cause is to be found in the jealousies of the wastern European powers, particularly Anglo-French rivalry in the Levant.

Not Even Temporary Peace

But this humiliating surrender does not necessarily involve even temporary peace. At Lausanne, it is apparently still assumed that the decision ently still assumed that the decision rests with Ismet Pasha, the Turkish delegate, for further attempts are being made to persuade him to accept the proposals. As a matter of fact the issue does not rest with Ismet. The decision will be taken by the Angora assembly and it is beyond the wit of the western mind to foreste the

which it is proposed to submit to the arbitration of the League.

The Straits convention essentially

Unlimited Forces

The original idea of keeping out the Turkish troops from Thrace has gains. A temperate, though persistent, confidence that the treaty will be great war is reduced to 15,000,000 Turkish pounds gold.

Objections May Be Raised

If, however, the Angora Assembly proves to be unreasonable from whatever motive, there are naturally numerous points on which objections may be raised. The utmost will be made, if only in order to bargain, of the removal of the British army from Gallipoli and the British fleet from the Sea of Marmora. But—and here the Sea of Marmora. But—and here lies the danger—the Kemalists, having gained so much, may decide that the rest is within their grasp and prove obdurate in such matters as Karagatch, the complete abolition of judicial and fiscal restrictions and the immediate settlement of an obscure controversy in their favor.

Once more they have been encour-

peace terms as merely the basis of negotiation. There is a mystery sur-rounding M. Poincaré's note to An-gora, which may only be cleared up by its publication in full, but what-ever its tenor it certainly gave the impression that France was indisposed to insist upon acceptance and ready to continue the negotiations. We have this from authoritative quarters in Paris and it is significant that Contentional telephone in the contention of the content of the cont Paris and it is significant that Constantinople telegrams also report that the French High Commissioner informed the Kemalist representative that the treaty was intended as the basis of discussion and Turkish objections to any of its features would meet the friendliest consideration from the French Government.

It is interesting to remember that France has done this on previous ocsaisons when the Afiles agreed upon proposals and it is quite understandable in the present circumstances that France should wish to avoid com-

mitments in the Near East and even FIRST STEP TAKEN view the prospect of British preoccu pation there as likely to give it freer hand against Germany. What-ever the contents of M. Poincaré's note it would seem to be a regrettable development and one little likely to assist in attaining the essential objects of the Lausanne conference.

. Lord Curzon Declares Peace and Reconstruction

Objects of Proposed Treaty LAUSANNE, Jan. 31 (By The Associated Press)-Lord Curson, British Foreign Minister, spoke on the treaty Foreign Minister, spoke on the treaty vesterday before the Near Eastern Concommanding general of the forces that ference. He said the primary object of the compact was to bring to an end at his headquarters at Düsseldorf to the terrible and devastating war inform them that France is deterwhich had desolated Eastern Europe mined to "break the resistance of the and large areas of Asia for more than German Government," for which pureight years and thus enable all the various armies, whether allied, Turkish or Greek, to go back to their

The treaty also was designed to enable the Turkish State, which was vanquished in the war with the Allies but victorious over Greece, to resume enter the comity of nations.

In the third place, said Lord Curzon the treaty was intended to build up relationships of amity, goodwill and friendly intercourse on equal terms between the Turkish state and the

other powers of Europe.
"Thus peace, reconstruction, and co-operation are the three objects," he pointed out. "The question was in obtaining them in the documents which had hung about the earlier meetings had been blown the breezes of Lausanne." Lord Curzon said every one regretted that there had not been an agreement as to every clause in the treaty, but was pressing, and Europe, indeed the whole world, was waiting, not for further debates, but for results. Therefore it was felt to be in the public interest that the proceedings should be brought to a termination, as he hoped they might be by common consent.

After a recess Dord Curron announced it would be impossible completely to satisfy the Turkish requirements as to time, but personally he was ready to remain at Lausanne until Sunday evening.

Later- it was announced denitely that the delay asked by Ismet Pasha would not be granted but that the British delegation would delay its departure until Sunday night. Meanwhile, it was added, efforts would be sponsible for all the trouble, and, made by private negotiations to reach therefore, must be removed a complete agreement.

"Tosca"

The opera 'last night was Puccini's with Claudia Muzio in the title rôle, of which she gave a wellrounded and carefully considered perfor nance. Her companions in the cast were no less effective, although the performance as a whole lacked spirit. This ranting melodrama is not susceptible of too much refinement, and has received more stirring treatsuggests the heights to which Puc-cini's genius might have attained had he been willing to devote himself to symphonic music. Mr. Crimi was in better voice than he has been before that the French are not murderers.

The predicts the ruin of the population of the Ruhr dietrick by war and the second of that magnificant and the second of echo of that magnificent villain, although vocally excellent. S. M.

Recital by Ethyl Hayden

Ethyl Hayden, soprano, sang last evening in Jordan Hall. Her program pelling many officials. Seven postal presented nothing unusual in choice of clerks at the Essen post office were songs although it was varied and conarrested yesterday and were brought tained pieces of interest. Among them were to be noted two songs by Ernest
Moret, known chiefly as a composer of
short plano pieces (Preludes, Chansons sans paroles, Jonchées d'Octobre)
of agreeable quality, more familiar
than his songs. Except for these and
a song by Cyril Scott, the singer ventured upon nothing novel. Miss
Hayden's singing is that of a wellschooled and intelligent artist. If her
interpretations are not particularly
original in conception, they are nevertheless well balanced and earefully
thought out. Would that singers of
her quality might now and again explore the vast literature of song, old
and new, and bring to light some of
the treasures to be found therein. It
takes a very great singer indeed to were to be noted two songs by Ernest takes a very great singer indeed to arouse interest in such well worn classics as Mozart's "Deh Vient" or

cent.

This percentage, if stated baidly without explanation of the cause, would be discouraging. In reality, however, if we inquire into the reasons for this apparent increase it would be found that these figures are far from depressing, in fact, quite the contrary. According to available records, during the years 1917 to 1920, due to the urge of patriotism and severe army discipline the ratio of serious crimes fell far below normal.

New Brunswick, were introduced and took With an address by Atherton Brow-nell of New York, member of the National Child Labor Committee, and had been completed. The five by-elec-tions by which they came to Parliament tions by which they came to Parliament brought no gain or loss to the three parties of the House of Commons. On the other hand the cession from the Progressive ranks of W. J. Ham-mel of Muskoka and J. Binette of Prescott, both in Ontario, to the Liberal ranks, has left the Prime Minister, W. L. Mackensie King, with a majority of two over the combined Oppositions.

The Governor-General delivered the speech from the throne as follows: I am glad to welcome you to a return to your parliamentary duties. In the interval which has elapsed since the last session, I have had the pleasure of extending my travels throughout western Canada and as far as the territory of the Yukon. The cordial hospitality everywhere enjoyed by Her Excellency and myself will be long remembered.

pared with last winter, and the restora-tion of our currency to a position of equality with that of the neighboring republic, are indications of the improved situation. The economic condition in European countries makes for em-barassment the world over. A much better situation in Europe will be neces-sary before we can expect a complete restoration of confidence in business affairs. In the meantime the Dominion has much reason for satisfaction with has much reason for satisfaction with the improvement that has taken place, and with the many evidences of a returning prosperity.

Conventions With Foreign Countries The desirability of obtaining the best available terms for the admission of our products in foreign markets has engaged the attention of the Ministry. Conventions have been made to govern trade relations between France and Canada and between Italy and Canada. These conventions will be submitted for

BRUSSELS, Feb. 1—In an interview in Le Soir. Henry P. Fletcher, the American Ambassador in Brussels, said to the Soir. Henry P. Fletcher, the Cauther seems to have realized the large cities of the United States that the Belgian ministers have always kept him informed of the situation and of Belgian interests. He adds that without any diplomator breach of confidence, he can state that Belgian politics have been as they ought to be. Belgium could not do otherwise but stand by the side of France in the Rubr adventure. This is his personal opinion, which he has expressed in his reports to his Government.

WASHINGTON GIVES RUM PERMIT TO 377 FOREIGN DIPLOMATISTS

America May Adopt Restrictions Similar to Those Imposed on Embassy Officials by Britain

By FREDERIC WILLIAM WILE

WASHINGTON, Feb. 1—Foreign diplomatists stationed in Washington may have to content themselves with rations of liquor. Highly suggestive information has recently come into the possession of the United States Gvernment, showing that there is a first-class precedent for restricting the quantity of alcoholic drink which foreign representatives may bring into the country duty-free. The prescedent has been established by the British Government and affects the diplomatic corps stationed in London. This writer has had access to documentary evidence which deals with the British regulations. Certain federal authorities are of the opinion that the British restrictive scheme offers an effective method of limiting "diplomatic liquor" in Washington to demonstrated personal wants, and even of restricting its importation to higher officials of embassies and legations. They believe that if the British and transport it "under his any deviced point of arrival and transport it "under his any deviced point of a complete and transport it "under his any deviced point of arrival and transport it "under his any deviced point of arrival and transport it "under his any deviced point of arrival and transport it "under his any deviced point of arrival and transport it "under his any deviced point of arrival and transport it "under his any deviced point of arrival and transport it "under his any deviced point of arrival and transport it "under his any deviced point of arrival and transport it "under his any deviced point of arrival and transport it "under his any deviced point of arrival and transport it "under his any deviced point of arrival and transport it "under his any deviced point of arrival and transport it "under his any deviced point of arrival and transport it "under his any deviced point of arrival and transport it "under his any deviced point of arrival and transport it "under his any deviced point of arrival and transport it "under his any deviced point of a purchase and spirits they pieze.

The British Foreign Office rule gov- no fewer than 377 persons, men and erning wines and spirits designed for women, and that the number shortly consumption by diplomatic officials is will exceed 400, the possibilities in the

as follows:

As regards articles brought by a foreign diplomatic representative and his staff on first arrival in this country:

As often as an ambassador, minister or charge d'affaires is accredited to this country by a foreign power, the Lord Commissioners of His Majesty's Treasury are apprised of such an appointment by a communication from the ury are apprised of such an appointment by a communication from the Foreign Office. Directions are thereupon given to the Commissioners of Customs to observe the usual respect in the examination of the baggage and effects of the new representative and of his suite, and such articles as are for his private use, and which personages of his rank may be supposed to require for domestic purposes, are passed duty free.

But with respect to wine, spirits and cigars or tobacco, under the following limitations—namely, in the case of an ambassador, the quantity of wine is limited to one tun, or 252 galfons. It is alleged that Mr. limited to one tun, or 252 galfons. Weber, formerly an insurance broker in case of a minister or charge d'affaires to half that quantity. The quantity of spirits is limited to 10 gallons, and the quantity of cigars or manufactured tobacco must not exceed five pounds in weight.

Brooklyn on a charge of grand larceny in the first degree by a jury before Judge Alfred J. Talley in Genambassador, the quantity of wine is alleged that Mr. Weber, formerly an insurance broker at 1170 Broadway, swindled clients out of about \$30,000 through an intricate system of placing automobile insurance, said to be currently in vogue. In this case it has been shown that

The information in official possesion at Washington further sets forth

To Halt Private Profit It is with a view to preventing privileged foreigners in Great Britain from trafficking for private profit in unlimited quantities of duty-free liquor that the British regulations were insti-tuted. They aim, in fact, to prevent "diplomatic bootlegging," just as the

British Restrictions des 'na'ion.

When it is understood that the latest Washington diplomatic list confers "diplomatic liquor" privileges on

Brooklyn on a charge of grand larstraines, said to be shown that in weight.

Secretaries of embassy or legation and attaches are not allowed articles duty-free.

The defendance interpolation in this case it has been shown that the money paid by the automobile owner passed through the hands of five intermediaries before reaching

the insurance company.

Owen W. Bohan, assistant district sion at Washington further sets forth that the amount of "diplomatic liquor" allowed to enter Great Britain duty-free is also restricted during the diplomatists' sojourn in London, as well as at the time of their first arrival on British soil.

The British Isles are, of course, not under prohibition laws, but the excise duties on wines, champagnes and spirits (liquer brandies, etc...) are exceedingly heavy. They are said to increase ingly heavy. They are said to increase cost, by at least 100 per cent.

Owen W. Bohan, assistant district attorney, who prosecuted the Weber case, says that owing to the complex methods employed, he doubts whether any automobile owner who has paid his premium has any way of knowing if his car is insured. So, involved was the plan that the district attorney's office is said to have spent about a year preparing the case for a jury.

Mr. Weber received the premiums on at least \$1,000,000 worth of cars, it is believed, between Feb. 1, 1920, and Nov. 4, 1920, but only about one-fourth of the premiums, it is further

fourth of the premiums, it is further alleged, reached the company that was supposed to have issued the insurance.

RAILROAD CHANGES FOLLOW DEMAND FOR MORE SERVICE

Greater Efficiency in Equipment and Men Pointed Out as the Trend in America

Demand for greater service from merican railroads is forcing radical hanges. Wastefulness and inefficiency in either men or equipmen are necessarily yielding to method that provide transportation adequate to needs. Coal-consuming steam locomotives of but 10 per cent effi-ciency are giving way to the less wasteful gasoline, oil-burning or elec-trical engine. Conciliation and production are replacing strikes and stogna-tion. Some phases of these problems with special reference to more obvious innovations coming slowly, perhaps, but surely are dealt with in a series of articles that will appear in The Christian Science Monitor. The first article tollows:

The pressing problem of the Ameriportation. The days of ambushed red man, pioneers who carried the steel trail across mountain and gin continent to come to clasps with each other, have given way to an era and plans laid for the future, to turn quently their own, is invested. and plans laid for the future, to turn the energy of vegetable matter into industrial alcohol, and to make such a vast waste of land as that found in one region of South Africa yield a fuel from its weed crop of prickly pears sufficient to turn all the motor and with an unenvisable bad order record. To improve all these factors

These are achievements bound up ment. with railroad history of the future—they lie not far ahead. The disorder disorganization that now mark some of America's carriers must give place to efficiency. Not less through the utilization of new sources of power will the change come, as through the better use of existing equipment, of engines, rolling-stock,

and above all-men. The present rail era began with the war. The huge steel web of carriers that enmeshed America on the Armistice comprised among other things: a total trackage equal to a ten-track railroad round the globe; a labor force of 1,600,000 men; 65,000 locomotives and 2.500,000 cars: and capital securtities of some \$20,000,000. This is the industry that sprouted from that historic rail and other steel progen-itors which Charles Carroll, last surviving signer of the Declaration of Independence, laid 95 years ago—the irst rail of the Baltimore and Ohio

the transition will not be slow, judging by the changes of the past.

In a short 20 years the railroad tonmiles have almost trebled, according to a statement issued by the United States Chamber of Commerce, following a conference of rail, motor car and waterway executives in New York. roads will do the next 20 years, and how increasing volume will be cared Government for general railroad purfor." Transportation executives are poses of all profits of individual composes of individual composes of individual composes of all profits of individual composes of in Transportation executives are to the problems ahead, and they decided at their meeting, at which Herbert Hoover and some of the most prominent railway men of the country took part, to start immediately a nation-wide survey of questions involved.

"There is great concern among all sections of American Industry-farming, mining, manufacturing, distribution—over the question of adequate transportation for our ever-increasing national commerce," they asserted.
"There is necessity for the early adoption of a national transportation policy which shall provide for further expansion of commerce."

War Changes Situation

The political considerations that bind the railroads at present should be understood, to get a clear picture of the present situation. For long compulsory competition was part of the federal and state policy toward the carriers, and an industry, which in the long run is naturally monoping the long run is naturally monoping the carriers and an industry which in the long run is naturally monoping the lon in the long run is naturally monop-olistic, had been kept from coalescing. The unsuccessful road can go bank-the fear of failure or hope of reward. The unsuccessful road can go bank-Roads were hampered in those days. The unsuccessful road can go rupt now as easily through incompetent management as later. That is petent management as later. That is conjuring trick: certain component eggs were being prevented from turning into an omelet by the untiring motorization of terminals is stronger vigilance of 48 state cooks and a than ever. federal chef-in-chief. The Great Efficiency must be won; it will Central Park, which was carved in Northern-Northern Pacific, and the come through higher morale and new Egypt 3500 years ago, was not set ac-Union Pacific-Southern Pacific were inventions forcibly prevented from joining for- In strai tunes, and remained in a curious state of arrested scrambilization.

The war changed matters. The efficiency that comes from large-scale resulting safety appliance duplica-tion, abnormally full "full crews," and restrictions frightening off new capi-tal, became acutely manifest.

The Interstate Commerce Commission, formed in 1887, when revelations of preferential rates granted Standard oil products made the time ripe, has emerged from the war with extraordinary powers. Long before the war, in the words of Prof. I. Leo Sharfman of the University of Michigan, "the American railroad system was failing in constantly inconstantly in constantly inconstantly in constantly in constant was failing, in constantly increasing measure, to meet the growing transportation needs of the country. The condition still remains. Under the

IN DETROIT SEND FETTER'S FLOWERS

semi-nationalization of war days, the roads were kept going, people were fed, the long, gay trains of waving, khaki-clad soldiers were kept moving, their supplies were rushed after them. With the armistice the full strain on rail facilities was felt.

Public Co-operation Needed Few people realize what the war

did to the railroads. Before the war gentlemen agreements tended to replace price-cutting competition that became disastrous when it went be-yond the point of being an econom-ically safe regulation. After the war the roads emerged, no longer with the right to fix their own rates, to determine the wages of their employees or to issue stocks and bonds, without The pressing problem of the Ameri-arst having proved their case before can railroads is to give more trans-, the Interstate Commerce Commission, or the Railroad Labor Board. Americans talk of nationalization as of something new and strange, yet on their own railroads private operation canon, the titanic struggle between in a strict sense is passing; the Government supervises business, a billion time in a battle with a vast and vir-Government dollars are invested in railroads, and this sum is likely to gin continent to come to clasps with railroads, and this sum is likely to heach other, have given way to an era how whit less romantic, of gasoline locomotives, of wires humming in the wind with the incalculable power they carry from turbine to engine, of the chemist's spotless laboratory where new fuel formulae originate. Government's money, and consequently their contents and consequently their contents are invested.

vehicles of the territory and in time record. To improve all these factors is a question of efficient management. In every one of them rail-roads have been progressively im-

proving for a decade.

In the 10 years before the war, wages increased 70 per cent, the freight load was made 66 per cent heavier, traffic output per employer increased over half, while rates did

not change.

This means that a virtual rebuilding of the roads has been going on all the time, that heavier roadbeds and rails, reduced grades and curves, bigger engines and freight cars, more tracks and terminals have been put into operation.

These are improvements of the pas The improvements of the future—and they are not far off—give promise of

Senator Cummins' Plan

Political restrictions governing car-riers at present which shall be understood in connection with rail changes of the future were based on three ideas which Senator Cummins, head of This system represents America's the Interstate Commerce Committee ability to move freely within herself; it makes the country's life fluid in-war. He said, in any scheme of reability to move freely within nerseit; of the Senate, put into effect after the stread of fixed. This was the weapon America carried into the World War. Startling changes are ahead of it, and capital for expansion; adequate procapital for expansion; adequate pro-fits are only possible with adequate rates; rates adequate for the average railroad will produce profits more than adequate, or downright exces sive, for stronger roads.

The co-ordination of these proposi tions was the "weak-and-strong-road" policy, embodied in the Transportation Act. The policy also had three parts. It allowed the recapture by the erty value (which was held to be a "fair profit")

The consolidation of the weak with the strong roads into a limited number of large systems in order to dilute the earnings of the rich roads for the benefit of the poorer ones, and eventually to set up a group of consolidated roads with approximately the same earning power so that rates could be adjusted to leave no excess profits to 'recapture."

With these established, Senator Cummins made the third plank, for a guarantee of a "fair return" to the carriers as a whole, with the Inter-state Commerce Commission ordered to establish rates that would produce this result.

Need of Efficiency Proved

New Methods Will Tell The constant development which is works: shown to have taken place in the permoit. MICH

past decade is certain to continue, but now in new directions, for the work of rebuilding American carriers on a sounder basis, and a larger scale is now partly accomplished. Twenty years ago who would have been bold enough to forecast the startling transformation to be wrought at the Grand Central Terminal, New York, where magnificent office buildings have taken the place of smoke blackened tracks, through the installation of electricity? Such developments indicate that other changes, ever more revolutionary are certain to come. There is a constant struggle for effi-There is a constant struggle for effi-ciency. New methods of employing men and machines will tell their own story in the future.

The Northern Heavens for February Evenings R KING have greatly changed the aspect of the winter the nebula through the manual compared with a larger nebular cloud which envelops the whole content of the winter the nebula through the aspect of the minter the nebula through the spect of the special BY EDWARD SKINNER KING

THE mest striking of the winter constellations, perhaps, is Orion, the giant hunter depicted in the old star charts as armed with a club and bearing a hairy pelt for a shield. Longfellow writes:

The Mystery of Nebulium What is this luminous, unform The grant hunter depicted in the old star charts as armed with a club and bearing a hairy pelt for a shield. Longfellow writes:

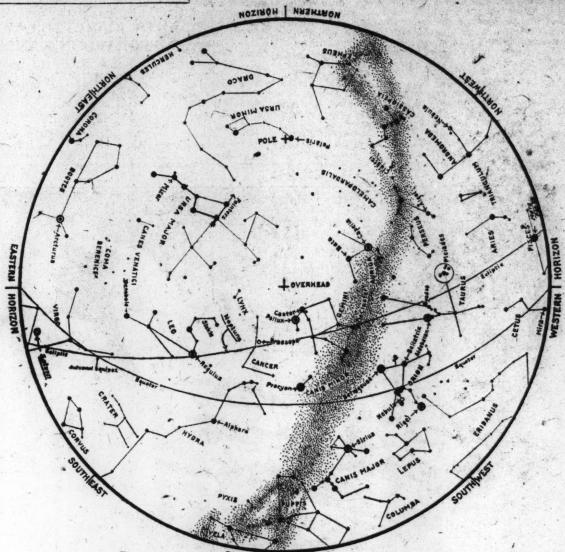

On his arm the lion's hide Scatters across the midnight air. The groden radiance of its hair.

No constellation is better known. The quadrangle of siars enclosing nozino | NNZNALMON

Nozino | NNZNALMON

What is this luminous, unformed body, which occupies in the aky an area about equal to a full moon? It is therefore concluded that the Orion nebula may be considered almost as a superficial fluorescence of the gaseous portion of the carrying molecules of gas with them. The dust is so finely divided that light pressure — as it is called — from the long the carrying molecules of gas with them. The dust is so finely divided that light pressure — as it is called — from the long the carrying molecules of gas with them. The dust is so finely divided that light pressure — as it is called — from the long the carrying molecules of gas with them. The dust is so finely divided that light pressure — as it is called — from the long that the Orion nebula may be considered almost as a superficial fluorescence of the gaseous portion of the vant dark cloud. Thus, the mass of dust and gas, standing almost stationary as related to our stellar system, is made visible only by the glow on its surface. What secrets are hidden within its depths, what powers its stupendous size may possess in celestial economy, can at present be only imagined.

At the right hand of Orion, we may

The February Evening Sky for the Northern Hemisphere

The map is plotted for about the latitude of New York City, but will answer for localities much farther north or south. When held face downward,c.tly overhead, with the "Southern Horizon" toward the south, it shows the constellations as they will appear on Feb. 5 at 11 p. m., Feb. 21 at 10 p. m., March 8 at 9 p. m., and March 23 at 8 p. m., in local mean time. The boundary represents the horizon, the center the zenith. For convenient use, hold the map with the part of the boundary down corresponding to the direction one faces. The lower portion of the map thus held shows the stars in that part of the sky according to their relative heights above the horizon.

The reserved elements are undergoored on the map. The names of planets are underscored on the map.

The bill, which was introduced by Henry I. Lauver, Representative from Juniata County, has been referred to the Hyades, and the Pleiades, parts of the constellation of Taurus. At the left of Orion is Canis Major, in which the "Dog-star," Sirius, shines most brilliantly. Above and on the other side of the Milky Way we come to Procyon, the "Fore-dog" in Canis Minor. The Twins, with Castor and Pollux, are high near the zenith. Passing northerly along the galaxy, we meet Auriga, Perseus, Cassiopeia, and Cepheus. The Big Dipper is climbing to its greatest height, which it reaches before morning. Below it Draco stretches down to the horizon. In the northeast Boötes is rising and Arcturus comes into view. Leo is almost due east, followed by Virgo just rising. Hydra, Corvus, and Crater in the southeast complete our survey.

The Planets

The planet Venus is a morning star and reaches its greatest elongation west of the sun on Feb. 4. It appears when viewed with a telescope as a little half-disk like the moon at the quarter. The planet is very bright. Mercury reaches its western elongation on Feb. 23. About that date it may be seen in the eastern sky before sunrise. It is much duller in lustre than Venus. Mars remains in the evening sky. It sets a little before

lustre than Venus. Mars remains in the evening sky. It sets a little before 10 p. m. At the end of February the time of setting will be only six minutes earlier than at the beginning of the month. Saturn rises just before our time of observation, and adds its beauty to Virgo where it is now placed. the month. Saturn rises just before our time of observation, and adds its beauty to Virgo where it is now placed. Jupiter appears after midnight. Uranus is near the sun, and Neptune, although its favorable position is indicated on the map, is always much too faint for unaided vision.

Willem Mengelberg at Metropolitan opera House this evening, returned to scene, the clarifying of secone, the clarifying of the secones. Baltimore, Md., Feb. 1

PRESENTING "Meistersinger," the German organisation known as the Wagnerian Opera Pestival, Georg Hartmann, director, opened its American season at the Lyric Theater here last night. The cast included Friedrich Schorr as Hans Sachs, Desidor Zador as Beckmesser, Adolf Lussmann as Walter, Paul Schwartz as David, and Meta Seinemeyer as Eva. Leo Blech conducted.

Certain difficulties inherent in the business of opera had to be overcome before the curtain could be raised on the grades among them for himself.

The Beckmesser of Mr. Zador was studied after the best traditions of the protesque portrait to what artists of other days have set forth. The Walter of Mr. Lussmann does not demand discussion, being a substitute characterization not likely to be seen and heard outside of Baltimore. Beckmesser's own jadgments of the prize singer were for once not to be dissented from.

The David of Mr. Schwartz was the combination of clownishness and man-

overcome by borrowings from various theatrical wardrobes and warehouses class sort. Only let them be sure that the public is interested in their performances, they know how to look after the rest. And interest on the part of the citizens of Baltimore, Philadelphia and New York, Mr. Hartmann and his people seem well assured of.

As for the first night, the Lyric Theater was filled with a delighted audience. Then, to turn matters around and consider the company objectively, and consider the company objectively.

The Germans, says Meredith, are true that the score and his interpretation of the score and his whole direction of the course of musical affairs is of a kind that must win approval. Good conducting can never dicate a wise, positive and musicianly mastery of the material he has at his disposal.

On several occasions this material he seen augmented to meet specific more voices of the charm of the baritone's voice in the occasion may be heard.

The Germans, says Meredith, are of the Minneapolis Orchestra. In fact

of Mr. Schorr was a strong portrayal to acquire a knack for comedy. Not and a pleasurable exhibition of singing. It was a much idealized shoeling. It was a much idealized shoeling. Heine, "depart, but the kings are still ried on from the point where Mr. ing. It was a much idealized shoe-maker, to be sure, but it was a man just the same, warm-hearted and sen-timental, and more concerned with keeping the members of the commu-nity of, Nuremberg on sociable terms their, and, on the whole, it is a very cheerful, satisfying best.

Ernest Schelling, the pianist, launched on the same afternoon at the Town Hall a series of recitals for consist entirely of piano concertos. In A major, op. 101, Schubert pieces and Liszt transcription of the "Erl-Ishould like to have one described to me. Talk about patrons of art Leville. me. Talk about patrons of art, I should like to know of anyone who has hitherto equaled this Mæcenas, who not only provides the wherewith for a were merely a man possessing means ic, extravagantly sonorous, much apto produce music in a big way and enplauded by the claque.

was on a part true; the tenor, grandhoduently tragsolo-playing. Little wonder that the
audience insisted on hearing again tertaining a bumptious desire to show himself off as a performer, that would be one story. But he is able to furnish both the externals of a recital for piano and orchestra, which, goodness knows, cost much money, and the inner substance of the thing, which costs—well, in what terms are talent and genius weighed, measured, and from the "Entführung aus dem Secounted?

A Modern Viewpoint

Chopin's concerto in F minor was a work in which I heard him at the Opera on the evening of Jan. 26, opening matinee. Times enough I Giacomo Lauri-Volpi making his first cerning it on this occasion I will only arias of the duke; not possessing the most liquid voice imaginable, but givplayed in a delightfully individual manner and was interpreted in a per The kind of man the organization snasively twentieth-century style. The concerto programs will prove, I be-lieve, when they are all done, to have been studied from a quite modern viewpoint; and anybody, therefore, who attends the recitals purely out of historic curiosity may, I think, be somewhat disappointed. Mr. Schelling, playing masterpieces in the piano concerto form, like Ernest Hutcheson, playing earlier in the season master-pieces in piano solo forms, seems to me to be re-examining the old reper-tory and squaring its message with

The players in Mr. Schelling's or-chestra are New York Symphony men. The conductor is that enthusiastic supporter of novel ideas, René Pollain.

Mr. Verbrugghen Resumes Baton in Minneapolis

MINNEAPOLIS, Minn., Jan. 28 (Special Correspondence)-Henri Verbrugghen is gradually adjusting himself to the musical conditions of the northwest, and, since his appointment as conductor of the Minneapolis Orches-

of the Minneapolis orchestra. In fact ried on from the point where Mr.
Oberhoffer left it. The two opening
movements of the Beethoven "Eroica"
symphony were the poorest played of
anything presented; and this was due to somewhat sharp accentuations of attack at the beginning of phrases. Once in a while this sort of thing can be condoned, but sudden sweeps of tone, without any perceptible reason, rather unbalanced the movement of thought, and weakened the emotional

beautifully played program at the university a few days ago. Her success was so pronounced that she was engaged to appear at a regular symphony concert next season.

Los Angeles Popular Concert

Popular Sunday Concert of the Phil-harmonic Orchestra under Walter and dry; again it is modulated by the

enced recently. The performance breathed "atmosphere." The intro-duction to the third act of Wagner's "Lohengrin" was the closing orchestral number.

Florence Ringo, soprano, was heard in "Ritorno Vincitor" from Verdi's "Aïda" and the Romanza from "Adriano Lecouvreur" by Francesco Cilèa. One could have enjoyed her offerings more fully but for a tendency to sacrifice tone quality for quantity. The tone itself was ample and endo with dramatic warmth.

PREDICT UPWARD PRICE MOVEMENT

Business and Financial Situation Excellent-Foreign Outlook Causes Caution

Optimism tempered by caution arising out of the situation in Europe and the uncertainty in connection with the domestic political outlook pre-vailed throughout January, according to the American Exchange National Bank of New York. The upward movement of prices showed a tendency to pause early in the month, but a firmer tone developed later and a continuance of the upward movement was generally predicted.

Forecasters were not inclined, howto make predictions running beyond the first half of the year. There were exceptions to this, but most of those who ventured to peer beyond June made it plain that the unconthroughout the year. Most of the op- as a brake to the soaring dollar. timism encountered around the end of the year arose out of the unexpect-

cated by the reports received, the unusual activity in the steel industry, and the unprecedented activity. and the unprecedented activity generally experienced in December, provided a back-wall of confidence which enabled the markets of this country ignore, in a measure, the unfavorable developments in Europe.

Undue Speculation Unlikely

In view of the fact that the price adjustment as between farm and manuheavier products coming up than in the factured products has not been comfirst three weeks of the new year. At pleted, the factors which compel caution have not been altogether unwholesome. It is possible that recent In Pittsburgh and adjacent districts experience is sufficiently present in the steel industry as a whole is still the minds of business men to insure averaging an 80 per cent to 85 per against undue speculation, and that cent operation, while the average for we would have had no important discounting movement even if conditions all districts exceeds the latter figure. wholly favorable. As a result of the caution being manifested. whether it is due to fear of unexpected developments or to a more con-servative attitude on the part of busi-come in upon them in the last week.

All of the data indicating exceptional business is not fully comparable, and wide margins for error must be allowed before accepting some of the current estimates of the actual state of affairs in business; but the testimony of the completely reliable added to the throttling of German data is the same as that of the not production, British steel has been in so reliable, so there can be no doubt great demand. Holland wants 10, that we are already in, or at least are 000 tons of ship plates, but British

verging on, a state of prosperity.

Labor statistics alone point to this three months. conclusion, the situation having the feature of the domestic iron changed from one of unemployment a market this week is the sale of 20,few months ago to one which threatens to develop a labor shortage.

Labor Supply Inadequate

The steel trade is already being just as the invasion of British and handicapped by an inadequate labor Continental irons, which was so supply, and trade advices are to the marked last year, was considered to uation may develop later on. Rising prices are almost certain to result in emands for increased wages, while any retardation of business which will very probably result in agitation lief for the farmer than at present

followed with caution, seems to offer cations. The completion of necessary legislation during the present session, resulting in the avoidance of an extra

DEBT SETTLEMENT **BULLISH FACTOR**

WILL CONTINUE Great Britain's Quick Acceptance of Terms Encouraging

LONDON, Feb. 1—Great Britain's acceptance of the American debt funding proposal has eliminated from the financial atmosphere one of the factors recently operating against stability, and an immediate effect of this decision was seen this morning on decision was seen this morning on the stock exchange. Fair orders were received for the gilt edge securities which, under the lead of the war loan improved smartly, imparting confidence to the other sections of the market.

At the same time, a note of warning against too much optimism was sounded in conservative quarters, where it was pointed out that the sanction of the American Congress to the proposals must still be obtained and other details settled.

The more favorable position of the foreign exchange market was regarded as largely sentimental, and although transfers rose to 4.66%, exvised caution, notwithstanding a strong probability that business conditions would continue to improve the debt payable annually and transfers rose to 4.66%, exchange experts said that business was not large in view of the large amount of the debt payable annually.

The improvement in the pound affected the French franc, which rose to 78.90, while the German mark sold at

STEEL PRICES ARE HIGHER DESPITE SOME DRAWBACKS

The Iron Age says: January ends with steel prices gaining in strength, though with a smaller business in the same time open mill capacity has shown even greater diminution.

the plants of the Steel Corporation. in With works under such strain meet domestic demand, steel producers can make little response to the flood

ness men, the strictly business and Germany has long been in default on financial situation is excellent.

Germany has long been in default on deliveries of steel to various countries, and the further shortages that will result from the siege in the Ruhr have caused many buyers to surn to this country and to England.

With shutdown of the Lorraine and Luxembourg iron and steel works, added to the throttling of German plate and sheet mills are filled up for

000 tons of Nova Scotia basic pig iron in Philadelphia territory at several dollars a ton below the price of Penn-sylvania iron. This competition comes

ELECTRICAL TRADE

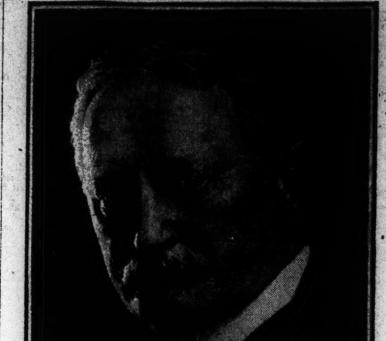

At this time the Ministry is particu-

arly interested in automatic telephon exchanges, says Consul L. Maynard in a report to the United States Commerce Department. The Egyptian Government purchases on tenders only one of the conditions always imposed is that the bidder have an A DEFINITE TREND agreement or representative in Egyp who can act for him before the bid will be considered.

JANUARY COINAGE

PHILADELPHIA, Feb. 1—Coinage by the Philadelphia mint during January consisted of 100,000 double eagles and 6,300,000 standard silver dollars, having a total value of \$8,300,000.

David R. Francis

AVID ROWLAND FRANCIS of Missouri has been Mayor of St. Louis, Governor of his State, Ambassador to Russia, first chief of a foreign mission to recognize the Russian Republic under Kerensky, member of President Cleveland's Cabinet and has other offices of high importance to his credit, but among his many achievements he takes the most satisfaction in the fact that he was head of the great Louisiana Purchase Expesition held in St. Louis in 1904.

He might also point to the fact that this world's fair had money left over after paying back a loan of \$5,000,000 to the Federal Government—money enough to erect a beautiful and useful memorial to the achievements of Thomas Jefferson, the man who bought the great west and northwest from France and had it explored by Lewis and Clark.

Governor Francis, as he is best known when he isn't called "our Dabe," is also a banker and a merchant; he has been curator of the Missouri University for years, is trustee of the New York Life Insurance Company, a railroad builder, and was at one time proprietor of the St. Louis Republic, a daily newspaper merged a few years ago with the Globe-Democrat.

Governor Francis made something of a stir, early in the nineties, when it appeared that Europe might not co-operate in the Louisiana Exposition, by going to most of the leading capitals and making personal calls on the rulers, soliciting (and getting) their promise of participation in the fair, promises that were kept to the full.

REPARATIONS PROBLEM HITS FOREIGN BONDS

Nine Active Issues Show Loss of \$47,000,000 Compared With Offering Price

HARDWARE TRADE BEGINS TO FEEL SOME SHORTAGES

"Shortages are becoming more acute, prices continue to advance and a speculative tendency is discernible n some of the current movements in he hardware market," says Hardware Age, which continues:
"Wire goods manufacturers in some

nstances are reported to have notified their distributors that they will be mable to accept any more orders for shipment before April 1. Jobbers report advance orders for all kinds of spring goods to be larger than at any time since the period of inflation. A big business is forecast for builders

"Manufacturers of builders' hard-ware have advanced prices on most lines approximately 5 per cent. Drog forged wrenches have been advanced 25 per cent; agricultural wrenches, 15 per cent; manila rope about 2 cents

CANADA'S WHEAT CROP IN 1922 IS THE LARGEST RECORDED

MONTREAL, Feb. 1 - Final Government figures on Canada's field The proportion of the bank's reserve to liabilities is now 19.70 per cent, compared with 19.90 last week. Clearings through London banks for the week were £754,746,000, compared with £683,214,000 last week and £765,075,000 in this week last year.

The proportion of the bank's recross for 1922 show that the wheat crops for 1922 show that the wheat crops for 1922 show that the wheat with 300,858,100 in 1921 and 393,542,-600 in 1915, which held the record until this past year. The yield for the live years, 1917-21 averaged 236,025, 200-bushels.

compared with \$931,863,670 in 1921.

WESTINGHOUSE IN GOOD CONDITION

Billings for the nine months will total about \$88,000,000 and bookings about \$105,000,000. Bookings and billings for the first three quarters of the current fiscal year compare:

situation in the Ruhr and in the Near

terial for electrification of 144 miles of Chilean State Railway, the first shipment in August consisting of 33 cars of apparatus. The contract to-taled \$7,000,000. In September West-inghouse closed with the Paris-Orléans Railway Company to supply equipment for 120 locomotives.

INLAND STEEL'S

YEAR'S GAINS

Among the Railroads

Financial Position and Sales
Outlook of Electrical Concern Excellent

The Westinghouse Electric Co. on a basis of the first nine months of the fiscal year ending March 31, 1923, will show approximately \$12,000,000 after charges and taxes, equivalent to about \$48 a share on (\$50 par) the outstanding \$74,812,650 combined wreferred stock and common stock (sharing allke in dividends after 7 per cent on the common). This would be about double the previous year, when \$3.89 a share was earned.

The full year's dividend requirement of approximately \$6,000,000 was earned in the first six months. The 7 per cent on the common \$70,818780. Since 1919 the company hand \$3.98,700 and the common \$70,818780. Since 1919 the company hand \$3.98,700 and the common \$70,818780. Since 1919 the company has paid \$4, or \$ per cent on the two classes of stock, requiring an annual diabursement of \$5,984,895, approximately \$50,000 a month.

Comparison of Bookings
Billings for the nine months will Stone, W. B. Preater, F. A. Burgess, W. E. Fitch, H. P. Daugherty, L. C. Griffing, S. H. Huff, A. Johnstoff, M. E. Montgomery, C. E. Richards, and H. E. Wills.

inghouse was a pioneer in the radio inghouse was a pioneer in the Chairman Tripp recently pointed out that a potential demand for electricity will exceed the supply and predicted that the competing railroad can offer "bargain days," similar to deform the reason that the only expense partments stores to stimulate freight

tials between railroad and truck and bus rates.

The Philadelphia & Reading Railway is a believer in "bargain" rates. It offers a variety of cut-rate excursions from Philadelphia to points in the Schuylkill Valley, to the New Jersey coast resorts and to New York. The Baltimore & Ohio and Pennsylvania also publish excursion rates for week-end trayef to various points, and, as prophesied by students of the subject, such cut-rate tickets are proving extremely profitable. Aside from the direct financial return they also serve the subtle purpose of also serve the subtle purpose of

which there has always been specula-tion, have been made public. While railroad men have known in a gen-treasury, of an authorized issue of eral way the scale of salaries paid, \$30.000,000.

general passenger agents, whose duties bring them into close contact with influential business men average below \$6000 per annum.

One economist has proved that were a railroad president to serve without current fiscal year compare:

Chairman Tripp recently pointed out that a potential demand for electricity will exceed the supply and predicted that by 1930 the present generating capacity of the United States will be doubled. Westinghouse can be depended upon to receive its share of the utility business.

Opening Foreign Trade

One of the favorable developments of the year was the closing of negotiations with Metropolitan-Vickers Electric Company, Ltd., whereby New Zearland, India, South Africa and Australia were opened up for the independent booking of business by Westland in the pendent beautiful the pendent beautiful the one pendent beautiful to demand the other was a believe in the pendent beautiful to develop the pendent beauting days," similar to despite the only expense of the the only exp the idea is a novel one and worthy efficient consideration.

WESTINGHOUSE AIR BRAKE PROPOSES

INCREASING STOCK Stockholders of the Westinghouse Air Brake Company will meet at Wilmerding, Pa., March 2, to vote on an increase of stock from \$30,000,000 to \$50,000,000. If the increase is authorized a 25 page cent stock divided of also serve the subtle purpose of breaking down the feeling that rates are high, and by thus currying favor with their patrons, the railroads are achieving results in their campaign of "the public be pleased."

The public be pleased."

Increase of stock from \$30,000,000 to stock Officials' Salaries sued at present, but will be held for Salaries of railroad officials, about issue as requirements arise.

Interesting Developments in American Railroading

Some important phases of this subject are dealt with in a series of exclusive articles in The Christian Science Monitor starting today

The demand for greater service from rail-I roads is forcing radical changes in transportation methods and management.

Problems of wastefulness and inefficiency, Whether they concern men or equipment, are pressing for solution.

Conciliation and production are replacing I strikes and stagnation.

> The subject will appeal to those engaged in transportation activities as well as to the general public whose welfare is of first consideration.

*Government operated property for five onths in 1918 and seven months in 1919.

Remarks of President Matt B. Jones, president of the com-

"With respect to construction of plant and the installation of service, the language of our last report is applicable but in an increased de-

The construction budget for 1922 which was there referred to was sur-passed and the runds expended for gross construction during the year in fact exceeded \$23,400,000.

"During the same period there were 193,385 station installations and 123.-339 disconnections, so that the net gain in new stations for the year was 70,046, although the transfer of 2629 stations to the Eastern Telephone & Telegraph Company one of our subsidiaries, reduces the gain in the number of stations operated by

our company to 67,417.

"Both the number of stations installed and the actual gain of new stations are the largest for any year in the history of the company, but they have been inadequate to satisfy the demand. At the same time material progress has been made in carrying service to sections that have been waiting for a long time, and the present outlook is that during the year 1923 conditions will improve still

further in this respect.

"The company completed during the year over 42,000 regrades, that is, the substitution of a higher class of service for customers who desired

such a change. The actual work of plant construction to make good the ravages of the sleet storm of 1921 disclosed more ex-tensive damage than anticipated when our last report was prepared, and charges against depreciation reserves in respect of plant losses due to that storm have, in fact, amounted to approximately \$2,000,000.

Results of Financing

'Late in May, 1922, \$35,000,000 first mortgage 5 per cent 30-year gold bonds, series A, were sold upon favorable terms. The proceeds became available early in June, and notes for money borrowed were at once paid to the amount of \$17,250,000. The remaining proceeds were invested temporarily, and have been drawn upon from time to time as construction of plant has progressed. At the close of the year there remains a balance of

"In 1913 your company adopted an employees' pension and benefit fund plan and reserved from surplus \$1. 000,000 to insure the carrying out of the plan. There has since been added to this reserve \$100,000.
"Since that date the scale of com-

pensation paid to employees of the company has very greatly increased, and the business requires the services of greater numbers of employees so that this reserve, which appeared ample under the conditions prevailing in 1913, has ceased to have a proper relationship to the obligations of the company under the plan.

"Your directors have, therefore, reserved out of surplus the further amount of \$900,000, which, added to former appropriations, creates a reserve of \$2,000,000."

AMERICAN STEEL FOUNDRIES' YEAR HAS RECOVERY

The financial report of the American Steel Foundries Company for the year ended Dec. 31, last, compares:

is greater than the company ever had any peace-time and will keep plants going at present rate of operation for at least six months, and if next summer's crops are good and European conditions do not become worse, it is expected that the com pany will go through the last half of the year on the same basis as the first, if not better.

CHICAGO WHEAT MARKET RALLIES AFTER A SLUMP

CHICAGO, Feb. 1—The wheat market underwent new declines in price today during the early dealings.

The opening in wheat, which ranged from %c to %c lower, with May \$1.18%, \$0.16% and July \$1.11%, was followed by a light further drop and then by a recovery to higher than yesterday's closing level.

After opening %c to %c lower, May 72%, \$673, the corn market reacted somewhat.

Oats opened %c@%c off, May 44% and later showed slight gains.

Provisions reflected the weakness of

DECEMBER FIGURES

OF USE OF WOOL The total quantity of wool entering into manufacture during the month of December, 1922, was 50,754,888 pounds,

December, 1922, was 50,754,888 pounds, as compared with 55,316,531 pounds in November, 1922, and 43,164,000 pounds in December, 1921.

Consumption for December, 1922, included 41,849,283 pounds of wool reported as in the grease, 6,965,336 pounds of scoured wool and 1,940,269 pounds of pulled wool. Reduced to a grease, equivalent these quantities grease equivalent these quantities would amount to 58,336,380 pounds. The grease equivalent for November, 1922, was 63,313,170 pounds, and for December of last year, 49,441,000 pounds.

DICTAPHONE END OF GRAPHOPHONE

BUSINESS-SOLD The Columbia Graphophone Company has sold its discrepance to the Dietaphone Company, a corporation that was organized to take it over and manufacture and distribute the product. A part of the plant at Bridgeport, Conn., of the Graphophone company, together with its maphone company together with it pany has sold its dictaphone business

Bank building. The officers of the new company are Richard H. Swartout, chairman of the board of directors; C. K. Woodbridge, president; Albert C. Andrews, vicepresident; Albert C. Andrews, vice-president; L. C. Stowell, secretary; Morgan L. Mercer, treasurer. The board of directors consists of R. H. Swartout, chairman; George A. Ball, Marsden J. Perry, R. J. Scoles, Paul Appenzeller, H. R. Swartz, J. Russell Clarke, C. K. Woodbridge and Alfred C. Andrews.

RESOURCES OF

cording to the annual report of orge L. Medill, state bank commisner, submitted to Governor Denney. ere are 41 state banking instituns, including branches doing busi-ss within the State, with combined sources of \$84,941,589, which is an erease of more than \$6,000,000 over

report of a year ago.
There was more than \$4,000,000 inase during the year in demand posits and \$1,642,953 in savings deposits. Total resources of the 18 national banks in the State are \$20,817,\$55. The taxes collected from the banking institutions in the State last year amounted to \$33,352.26.

RUSSIAN BANK OPERATIONS
LONDON, Feb. 1—A Moscow message says the Russian State Bank is offering clients foreign currency in unlimited amounts. Formerly it bought foreign currency as low as possible and sold practically none, its rates when it was prepared to sell being so high that buyers preferred to deal with "black" or unofficial exchanges. There is now practically no difference between rates of the latter and the StatesBank.

BANK RATE UNCHANGED

LONDON, Feb. 1—The Bank of England's minimum rate of discount remains unchanged at 3 per cent.

PACIFIC MILLS' YEAR STRIKING

Net Earnings of More Than \$1,300,000 Considered Remarkable Considering Strike

The statement of the Pacific Mills Flas Bulk of Business

for the year ended Dec. 30, 1922, showing net earnings of \$1,354,594 is considered a remarkable achievement when it is realized how severely the

showing the greatest output of cotton cloth in its history. The company is turning out in excess of 6,000,000 yards a week, or at the rate of 312,000,000 yards a year. Its best previous record was 235,000,000 yards.

has always been able to show substantial earning power. In 1921 and 1920 the company averaged \$22 a share for the \$20,000,000 common then out-

Net sales are now running in excess of \$50,000,000 a year. In 1920 net sales reached the high point of \$66,-078.797, but the unit cost of goods at that time was much higher than at present. On the present basis of operation net profits should be at least \$5,000,000 for the year. This would mean more than \$12 a share for the new \$40,000,000 common, on which a first dividend at the rate of \$6 has just been declared. The stock sells at 97, to yield 6.2 per cent.

AMERICAN WRITING PAPER OPERATING CLOSE TO CAPACITY

American Writing Paper Company plants are running 95 per cent of ca-pacity, compared with 90 per cent in the late months of 1922. January incoming business was the best in many months.

A year ago plants were running only slightly in excess of 50 per cent. Operations from then on increased rapidly, going to 80 per cent in the early summer and 90 per cent later. It is only on large-scale operations that the company can make money.

The 1922 annual report will be disappointing, showing that the company just about broke even after bond interest, though liberal depreciation

for 1922 shows these	changes:
	1922 Increase

Against Dyestal's Act

The Manchester Chamber of Commerce has come out with a definite pronouncement against both the Dyestal's Act and the Safeguarding of Industries Act. The directors of the Chamber of Commerce recently caused a ballot to be taken of the members on the question of these two measures, with the result that both were condemned by a majority of, roughly, four to one, and the Government was called upon by a direc-

regular quarterly 2 per cent dividend, payable March 15 to stock of record Feb. 28.

Owens Bottle Company declared an extra dividend of 25 cents and the regular quarterly of 50 cents on the common and of \$1.75 on the preferred, payable April 1 to stock of record March 16.

Southern Pipe Line Company declared a dividend of \$4, payable March 1 to stock of record Feb. 15. The last six quarterly payments have been \$2 a share each.

Sherwin-Williams Company declared the usual quarterly dividends of 2 per cent on the common, payable Feb. 15 to stock of record Feb. 1, and of 1% per cent on the preferred, payable March 1 to stock of record Feb. 1, and of 1% per cent on the preferred, payable March 1 to stock of record Feb. 1, and of 1% per cent on the preferred, payable March 1 to stock of record Feb. 15.

Nonquitt Spinning Company declared the regular quarterly dividend of \$1.50 a share, payable Feb. 6 to stock of record Jan. 80.

Campbell Soup Company declared the state of Output 1.

Restriction to one, and the Government was called upon by a directors' resolution to repeal the acts at the earliest possible moment.

Moreover, the resolution recorded the opinion that in so far as safe-guarding of essential industries might be essential for national safety, such end could best be secured by means of a subsidy. The effect of this important pronouncement cannot yet be foreseen, but the fact that it has been made is considered of no little importance, now that the acts have had sufficient time in which to justify themselves.

Restriction of Output

Restriction of Output

Apart from this decision by the leading members of the cotton trade and other representative industries, the last period of 1922 was made interesting by the experiment of closing down the mills engaged on American cotton from Friday night to Tuesday morning each week, and the subsequent discussion that ensued on the merits of an organized short time schedule as a cure for uneconomic prices. A special committee has been sitting for the purpose of investigating the subject, but it cannot be said that the industry is convinced that the remedy is the right one.

Artificial restriction of production has been proved effective in certain circumstances, it is admitted, but in the present case, even if higher prices

Skiers of the Trails

TEVER before had Patsy had such an exciting winter. First of all, she was growing bigger, and, of course, the bigger you get, the more fun you have; secondly, she was finding more "outdoor" friends among boys and girls; and, thirdly, she had joined a regular grown-up to the bad both with the distribution of the second was the second with the second was the second wa ski club, with all the adventures that that implied. Every two or three days she would receive a long, typed letter of club news, proposed hikes, information about trains, farmhouses where you could find a hot supper awaiting you, and funny jokes about members. She would read every word of it carefully, and then talk plans over with Dick or Fern or Bobby.

"Let's take the Kingsmere-to-Camp Fortune trip this Saturday. It's only seven miles and it says here that you can stop at Mrs. Murphy's for supper. There are great hills and—"

"Listen to this," continued Patsy, reading from the circular:

"Moonlight hike, Thursday, to Ye Olde Homestead Inn. The trail, blazed by Mrs. Johnson, follows the Mountain Road to the Second Ravine, through Evergreen Trail, skirts Loon Lake through heavy bush. Plenty of dips and hills, with tumbles assured.

Dancing and hot-"
"What's the good of reading all that when we have to stay home and study? Let's arrange for Saturday," said

Saturday morning, a few minutes before 9, found eight boys and girls grouped around the ticket window, in the big Central Station. The rotunda was gay with over a hundred other travelers, armed with skis and tickets for the Gatineau hills. Although no two were dressed exactly alike, all appeared neat and picturesque in closebreeches, bright-colored jerseys or blanket coats, wool caps or toques, high-laced boots. Everybody was laughing and joking, plainly out for a good time. . . . A heavy voice bellowed, and there was a surge toward the platforms. In a few minutes the four coaches were full, with people car. Fifteen minutes later and the was racing between snow-cov ered meadows toward the turquois

What with everyone talking at once what with everyone talking at once and trying to watch the scenery, it was now easy traveling homeward. "I should say not. I could keep this was no time at all before the conductor shouted, "Chelsea—Chelsea," and Patsy and her friends shoved out wound about through hemlocks and after an hour they were on the to the platform. The little station was swarming with skiers, some pil-ing into rigs, others fastening on their blades, others running wildly about looking for their poles or knapsacks. The eight scrambled into a huge four-seated sled, with their skis bristling out from beneath their feet and a dozen other cheerful Indians and a dozen other cheerful Indians packed around and over them, and began a four-mile drive to the highest part of the hills. Although the sun was brilliant, the air was nipping and the boys were continually leaping off to run alongside. Now and then Pete Higgins would touch up his team and it would be nip and tuck the runnars would result to the runnars would result to the forest part of the hills. Although the sun in front rang sweetly on the frosty air. Tree trunks cracked like pistol shots. A squirrel chittered shrilly as they passed. It was a white, blue, and green fairyland. Patsy was too delighted for words. She hoped that the trail would never end. whether or not the runners would regain their places, with the girls screaming and the lads shouting reat last at a rustic cabin in a little said Fern.

entered. A dozen up in the saw, and one is a beauty.

I want to go on a moonlight hike, Our hillside, on a winter day, too," said Patsy. "Think of going the nicest place to play! track, starting down a long, sloping steaming on a box stove. Mitts and through the woods at night!"

Sun—Our hillside, on a winter day, too," said Patsy. "Think of going is just the nicest place to play! through the woods at night!"

How to Make a Nature-Calendar

N THIS column each month I am going to tell you how you can do all sorts of interesting and useful little things, things which you can quite easily make for yourself, without spending much, and yet which will give you long months of pleasure in using them, and in watching how they

told you just how you should set to work to make nesting-boxes, to encourage the birds to build the courage the birds to build the course and rear their families in your garden. You may have thought it very early in the year to talk about birds' nests; but, unless you get the boxes out long before the birds really need them, they will be too shy to use them until another year.

Now, if you are going to watch the little birds in your garden, and take an interest in all their work and play for they love their games, you know just as we do ours—there is one thing which you ought certainly to make as soon as you possibly can. If you make a habit of watching any

bird, or animal, or insect, or even a flower, it will not be long before you discover that it has more things to tell you than you ever imagined could be possible. In my own garden, I have been watching the ways of these little birds every day for more than 15 years, and yet they are always teaching me something quite fresh about the pretty habits in bird land. Why, even yesterday the sparrows were playing a game I have never once seen them at before—but I must not tell you about that just now.

Records of Your Discoveries And it is just the same with the insects, and the flowers, and all the other living children of nature; and,

BINDING **ENGRAVING**

The QUALITY PRESS 181 East Third Street DAYTON, OHIO Second Ploor if you are going to make the simple little things I shall describe to you, you will miss half their interest and value, unless you keep regular notes and sketches of all that you hear and see. That is why I am going to tell you this month how you can make your own little nature-calendar, and how you should use it as a part of your hobby as soon as it is ready.

First of all, you should remember that nothing is too simple in nature for you to sketch or to write about.

Interesting book to show to your forest.

Substance of this kind is more like a diary than a calendar; and, if you would like a calendar to hang on the wall of your room, you can make one quite simply out of sheets of clean paper, and a large double-lever letter-clip, which you can buy at any stationer's shop. The handles of the clips are pierced with holes, so that you can hang them easily upon a nail on the great forest.

5. When the boy came near I gave him my hand.

6. Considering what he is worth, a van, although expensive, is not an extravagance.

7. Although paler, most people thought his complexion more becoming.

8. The author admitted the absence of the myth an oversight.

9. Laziness effectles the understanding.

for you to sketch or to write about. In my own calendar, I put lots of notes every day, and sometimes sketches, too; and, if you will decide to do the same kind of thing, you will soon find that it not only gets more and more interesting as time goes on, but also that you are seeing and hearing whole scores of sights and sounds which had altogether escaped your notice before. And this should encourage you to continue.

Later on I shall fell you how your anature-calendar which will last you. for you to sketch or to write about. the wall.

escaped your notice before. And this should encourage you to continue.

Later on I shall tell you how you can easily take simple little nature-photographs of things which you find photographs of things which you find enables you to change the monthly enables you to change the m specially interesting; photographs, too, which need no camera to take too, which need no camera to take them, but only simple apparatus, which them, but only simple apparatus, which you can easily make for yourself at home. Then you will be able to paste these on to your nature-calendar as these on to your nature-calendar as the second your nature-calendar as you can make them into a most useful guide for the new year to come. watching the growth and developm or even artistic, as well as useful and

The Calendar Itself

But now for the calendar itself: You can make this in many forms, according to your own taste and wishes; or, of course, you can buy one all ready for use if you prefer to do so. You should not, however, choose a book or an album in which all the pages are ruled, for you will need some plain pages for your sketches. A photograph or an auto-graph album makes quite a nice na-ture-calendar, if carefully and regu-

seemed to me that I could never smile glass.

with us. When she had taken off her bonnet, she turned to me and said:
Here is a surprise for little Ross, and she held out a big package.
When I opened it, I could hardly speak, for there was a big doll, with wide blue eyes and yellow hair. I played with her all the morning, and then the two little boys who lived next door came over and wanted me to play parade with them.

"We got a little cart and filled it with grass and flowers as a throne for Araminta. My mother let me have an old red and green plaid skirt, and a bonnet with a long, curly feather. The boys had made paper caps and they wore bright red sashes around their waists. Our mothers gave us some bread and cookies, and we started off, with my dog Dicky following at the end of the procession.

We went through my yard to the boy's yard, then over a field to a brook where we often played.

"I didn't run over and look at it at brook where we often played.

"I day because Auntie with the supper with the given have supper with the given have supper with the sit pown people and, because Auntie was there, I might wear my best dress. This made me feel better, I might wear my best dress. This made me feel better, I might wear my best dress. This made me feel better, I was all warm and dry I went to my room to put on my best dress. Go years ago," Grandma replied to the question in Rosa Lee's bright eyes, "was of crimson and blue cloth, buttoned in the back. The sleeves were short and puffed to the elbow. Around the skirt thus after my grandma.

"I had just got my dress buttoned in the center. The buttons were black with a big button in the center. The buttons were black with crimson and blue edges.

"I had just got my dress buttoned in the same name. A few day," nod day later there was the feel better, I was all warm and dry I went to my best dress. Go years ago," Broad the public dress. THREE GAMES ON PROGRAM TODAY

Vaughn, Raynolds and Shoemaker Tied for First Place in , Pocket-Billiard Table

AMATEUR POCKET-BILLIARD CHAM-PIONSHIP STANDING

Special from Monitor Bureau

NEW YORK, Feb. 1—Three games are scheduled to take place today in the United States amateur pocket-billiard championship tournament which is being played at the rooms of the Crescent Athletic Club, Brooklyn. This afternoon C. A. Vaughn of Chicago will meet E. F. Raynolds of New York; while J. H. Shoemaker will play the loser of the afternoon match in one of the evening games and W. J. Harworth of Cleveland will not be the strength of the will play Humboldt Foss of New York in the other evening match.

Shoemaker and Raynolds both im-proved their positions in the standing yesterday and now are tied for first position with 2 victories and no defeats with C. A. Vaughan of Chicago

occupying the same position.

Shoemaker, who is the present champion, disposed of Harworth, Ohio champion, pion, in the evening match in a carefully played game that required 68 innings before his score reached the required 125. Harworth scored 73, 40 of this coming in three frames, when he overtook the champion and forced last night. The Crimson from the the latter to play safe for the balance start had the Milwaukee team marked the latter to play safe for the balance start had the Milwaukee team marked of the contest. In the third and fourth and advanced almost at will into the frames Shoemaker made a run of 20, visitor's territory. The Milwaukee and followed in the eighth and ninth speed skaters many times passed with another of 24, which gave him a through numerous holes of the Crimsafe lead, which he held until the end son forward line, but not with the of the contest, though he continued his safety play throughout. Shoemaker took advantage of every break, and as the Cleveland player grew careless toward the end, increased his skillful angle shooting until it reached its best. Shoemaker to skim the boarded sides or shoot the individual championship in that the puck ahead and skate around to the individual championship in that the puck ahead and skate around to the individual championship in that the puck ahead and skate around to the individual championship in that the puck ahead and skate around to the individual championship in that the puck ahead and skate around to the individual championship in that the puck ahead and skate around to the individual championship at the Herry and the puck ahead and skate around to the individual championship at the Herry and the puck ahead and skate around to the individual championship at the Herry and the puck ahead and skate around to the individual championship at the Herry and the puck ahead and skate around to the individual championship are beginning to emerge the puck ahead and skate around to the individual championship are beginning to emerge the puck ahead and skate around to the individual championship are beginning to emerge the puck ahead and skate around to the individual championship are beginning to emerge the puck ahead and skate around to the individual championship in that the puck ahead and skate around to the puck ahea Shoemaker did not make a single scratch during the contest, while two were scored against Harworth, one but difficult angle shots or distance coming at a critical moment, which shots were made. Max Smith, Milgave Shoemaker position for a long waukee's center, could make no im-The score by frames:

ran away from Foss, winning every frame but one, and making a high run of 22. Foss was far below his usual form in the early frames of the contest, and only reached even passable play in the last two frames. The game was finished in 26 inpings. Foss ward, when he carried himself, the managed to score 40, with a high run puck, and Moore into the net. managed to score 40, with a high run of 9. The score by frames:

INDIANA BEATS

Years-Score, 31 to 26

LAFAYETTE, Ind., Feb. 1 (Special)
—Indiana University succeeded for the first time in six years to gain a victory over the Purdue University five, but not with ease, as the contest was one of the hardest-fought games ever seen on the local court, 31 to 26. Indiana trailed at the halfway mark, having 11 points against Purdue's 12. The playing of both teams was ragged at the start of the contest. at the start of the contest, each side MISSOURI IS WINNER seeming to be puzzled.

M. J. Nykos '26, who became eligible

this week, started the scoring from the foul line. D. V. Holwerda '23 this week, started the scoring from the foul line. D. V. Holwerda '23 counted the first point for Purdue by making one from the foul line. W. H. Robbins '25 was the only Old Gold and Black player that could connect for any field goals in the first period. Five-times he dribbled through the entire Indiana five for under-the-basket shots. Holwerda made Purdue's other two points from the foul line. Eugene Thomas '23, with his long shots, and Nykos kept Indiana in the running the first period.

The second half saw P. B. Parker

ST. LOUIS, Mo., Feb. 1 (Special)—The University of Missouri last night won from Washington University, 22 to 26, the most hard-fought basketball game played this season in the St. Francis Gymnasium. The Black and Old Gold stands second in the Missouri Valley Conference, with seven victories in the eight games played. The Red and Green has broken even, having won three games and lost three.

Missouri held a comfortable, though narrow, lead through the first half,

cup this afternoon resulted as fol-lows: Aberdeen 2, Ardrieonians 0, Rathgate 0, Queens Park 2, East Fife 1, Kilmarnock 0, St. Bernards 2, Dun-

SARANAC LAKE, N. Y., Feb. 1-Miss Lillian Scharman Springs

Surprise by Defeating Mrs. Cole

Special from Monitor Bureau

NEW YORK, Feb. 1—Only one of the two semi-final singles matches of the women's invitation indoors tennis tournament of the Heights Casino will be played today because Mrs. F. I. Mallory of New York, national woman champion, who was almost forced to default the match she won from Mrs. DeForrest Candee of New York, yesterday, has been granted a postponement.

The winners nad much the better of the play in the first two periods, but the granted william Burch, the former New Haven (Conn.) player, winning the one-half and three-quarter mile events. Kasky and C. P. Gorman, St. John, N. B., fought out lost, but he grandually found his bearthe play in the first two periods, but two periods, but two periods, but the play in the first two periods, but the default the match she won from Mrs.

DeForrest Candee of New York, yesterday, has been granted a postponement. Iwo events are scheduled for today in

passed to Reise for the losers' final previous meets, gave both Kasky and

tomorrow. Miss Scharman, a newcomer in fast tennis circles, has been one of the surprises of the tournament.

Miss Scharman won her way to the semi-finals yesterday by her victory over Mrs. B. E. Cole 2d, veteran Boston player, after two spectacular sets, 6—4, 6—4. This was the outstanding to the following services of the foll pset of the tournament.

Miss Bancroft and Miss Wagner overworked.

were easy to pass and Forbes was Richard Donovan, Johnson City, and Octave overworked.

Gorman managed to make third place. Boucher and Joliet were the best The time was 2m 14 1-5s. The sum-

Half-Mile Race—Won by Harry Kasky, Chicago; C. P. Gorman, St. John, N. B. second; Frank Garnett St. John, N. B., and William Murphy, New York City, tied for third. Time, 1m. 18 4-5s.

Three-Quarter-Mile Race—Won by Harry Kasky; Richard Donovan, Johnson City, second; C. P. Gorman, St. John, N. B., third. Time 2m. 14 1-5s. of the game. Boucher scored three goals, two of them by following in after shots by team mates and shoot-ing in the rebounds before the Ham-

Boucher scored the only goal of the surprise of the tournament, again met defeat, this time paired with Mrs. G. A. Adams of Brooklyn. They were defeated by Mrs. S. F. Weaver and Mrs. DeForrest Candee of Hempstead, N. Y., 6—3, 7—5.

The Boston team, Mrs. B. E. Cole 2d and Miss L. H. Bancroft, won a fine victory over Mrs. S. H. Waring and Mrs. A. H. Humphries, 6—3, 6—2.

HARVARD WINS AGAIN By coming from behind in the last five minutes of the game, the Harvard varsity basketball team added anothe victory to its list last night when it defeated the Massachusetts Agricultural College five at the Hemenway Gym-nasium, Cambridge, 23 to 20. Both teams devoted most of their aftention

to a defensive game during the first half, the score at that time being 9 to 6 in favor of M. A. C. PRINCETON BEATS ARMY WEST POINT, N. Y., Feb. 1—Princeton varsity ice hockey team defeated the United States Military Academy sextet yesterday, 6 to 2. The Cadets were outclassed all the way, even though the Tigers were without the services of their two stars, Capt. Howell Van Gerbig '24 and E. C. Stout '25.

ADAMS TO SIGN CONTRACT PITTSBURGH. Feb. 1—C. B. Adams, veteran pitcher of the Pittsburgh National League Baseball Club, has notified the Pittsburgh management that he will sign a contract to pitch for that team during the coming season.

Gerard Stars for Victors and Roach for Losers

NATIONAL HOCKEY LEAGUE

Won Tied Lost Pts

OTTAWA, Ont., Feb. 1 (Special)— The Ottawa Senators maintained their one-point lead in the National Hockey League by defeating the champion St. Patricks of Toronto here last night, by 2 goals to 1. It was the second victory by this score that the locals have wor over the Toronto team this season and the fourth of the five games that the two teams have played that have

shot. Seven minutes later Gerard rushed. Roach stopped two shots in quick succession, but was finally quick succession, but was finally beaten when Gerard passed across to Nighbor. Three minutes later Gerard duplicated his rush and passed to Darragh and the latter scored what proved to be the winning goal. The remaining 41 minutes passed without a goal, al-

though both goalies were called upon to make a number of brilliant stops Roach in the visitors' goal being the star of the game. The winners had much the better of the second period and for practically the entire 20 min-The meeting and the banquet to follow will also offer the newly elected and Roach's work alone prevented the president, D. F. Davis, donor of the Senators from widening their margin. The visitors were without Dye.

Nighbor played only during the latter part of the game. Boucher was moved up from the defense to center, while Clancey paired with Gerard on the defense. The latter was the best of the locals and in addition to making many atttacks on the Toronto goal, he played a superb defensive game and in the closing period did much toward preventing the losers from equalizing. Benedict in goal played well, while Darragh, Broadbent and Dennenay turned in their best efforts of the local season.

Andrews, Adams and Noble were the pick of the losers after Roach, whose exhibition was the best of any goal tender seen here this year. The

Colleges Must Keep Faith in Men and in Democracy, Says Meiklejohn

That America will in this twentieth That America will in this twentieth century achieve that ultimate social state, "democracy without privilege," Amherst's president accepts as the only logical, the only possible, basis for American educators to build on fields to learn the technique of thinkis confident that democracy has ing, but I'd keep them all bound to not failed and will not fail. Yet he gether by one common course.

He has a prophecy for the part that he small liberal college in America

lem of making out of groups of peo-ple genuine, unified spiritual bodies which have some common experience, so that each individual finds the major

part of his interests and experience coming out of the life of the com-

We don't know what to think about any of the essential features of our human experience. We are lost, bewildered, in the maze that faces us of life in which we may go on in some sort of command of our common faith. We haven't wisdom to teach, and if you ask what is the matter with our young people, it is that they know we haven't in any real sense a philos-

Freedom Not Yet-Really Ours As to freedom, our will is not fixed by clear deliberate choice. The times have changed since our fathers firs put the word upon the books. with changing times freedom itself change. We have the word which others gave and yet we have not made it ours. Our home we have made, but we have not made our

We as a people have not willed what we shall be. No better illustra-tion could be found than what we did and failed to do in the war. We went in mighty strength and with courage and resolve. We put our purpose into ringing words that stirred men's hearts. And now we are not quite sure what they are about. We didn't play. But now the time has come for pendent, we must make a culture of will the Nation be brought to tread

Elective System Blamed

That way is pure democracy, with

tion of thoroughly modern buildings in the central localities. A substan-tial increase will be made in the num-ber of supervisors and the whole

work in the elementary grades and three years each in junior and senior

Amherst, Mass.

Special Correspondence
N AMERICAN democracy without
a privileged class is the goal
that President Alexander Mei-A that President Alexander Mei-klejohn of Amherst College would set before the American people for this century. And particularly before the American colleges. For the forging of true democracy, he holds, is de-pendent upon the fusion of America's get hold of human life as an enter-mingled peoples into one race, and prise of the human anglet. It's an mingled peoples into one race, and that in turn involves the achievement of an independent American culture, which is the task of the liberal every freshman and sophomore engaged for two years upon a single piece of work, and I should like to have him know that his college com-

not failed and will not fail. Yet he builds no illusions. He sees it as a task in education. Being a college president, he sees it as a responsibility of the liberal college.

Part the Small College Is to Play

He has a prophecy for the part that

To leave the prophecy for a paragraph, President Meiklejohn blames the elective system for many defects in college education. Among other things, he feels that it exalts the teacher too much. "It is the business of the American college to stoop nes of the American college to stop this sentimental hero worship in shall play in the attainment of democ-racy that runs through all his public sists. "It is the business of the teacher racy that runs through all his public speeches, and through his chapel talks. It is bound up in the program of Amherst College. And it has a vital ers have impressed themselves on relation to the future of America. It relation to the future of America. It is, he would hold, the future of America.

The thread of his prophecy runs essentially like this:

The great problem of American life and of American colleges is not the problem of the individual; it is the problem of the community; the problem of the community is the community that the community is the community is the community that the community is the community that the community is the community is the community that the community is the community that the community is the community is the community that the community is the community that the community is the community is the community that the community is the community that the community is the community that the communit

Greatest Hope Lies in Colleges Upon the small liberal college very argely rests the responsibility of at tempting to set up again a scheme of values, a settled belief. The college must seethe with the enthusiasm of that attempt. We have got to make teachers to take hold of American youth. The greatest hope of the American people lies in the attempt of the liberal college to lead the youth gathering together again a scheme of of America to a realization that human life is an essentially beautiful

> In the next century America will to make a culture of its own. will make the individual lives of men the ends we serve. We will keep faith that these ends have rightness privilege that the people cannot get can describe at length, and with movind of whenever they will? Is there ing pictures illustrating the developlic administration that the people can-not throw out whenever they choose? could be applied to the study of ani-And if they do not, if privilege seems mals or plants.

> I see no deliberate attempt to teacher. Those who know the city thwart democracy, although I see men of power who are contemptuous of much loose thinking. In time of pres- in itself. Anything that stretches the fathers set before us as principles of our democracy will always unseat privilege. They are a part of our national way of thinking. As a practical matter the people will always brand as inferior any group that calls itself the elect, with peculiar qualifi-

no place for any special privilege. No ing and real learning is, she can make venture. Experience has proved the place, for instance, for Anglo-Saxon culture to dominate: the dominant strain will voluntarily lose its separate life in finding a common and a racial aristocracy, democracy must in the ways of life. The colleges must set he a racial aristocracy, democracy must in the ways of life. The colleges must set he are not to have a racial aristocracy, democracy must in the ways of life. The colleges must set the jobs fit of a teacher visit the best picture of the film of great expeditions. The democracy as a form of government great delight taken by many children and to show anything of the film store must build my course of teaching. I the great demand for literature, both the great demand

The Observatory

T MUST be a source of considerable ation or it may be the result of a new satisfaction to the United States attitude toward a great profession,

that its entire program for school betterment in Currituck County, North Carolina, has been adopted and will soon be put in effect. Not always is

such ready and complete response ac-corded the suggestions that grow out tial aid to that movement which has

of Government educational surveys.

Sometimes the will is lacking; more goal. By the formation, in many often the means are not at hand. But

Currituck has both will and means, and the result is that it promises soon to be one of America's model counties study of educational problems and of

in the matter of rural schools.

Partly responsible, perhaps, for the prompt acceptance by the voters of the additional financial burden now to be imposed upon them is the campaign of stimulation and information which was part of the survey. The federal specialist not only studied the

federal specialist not only studied the sociation, composed of superintendents district; he likewise held frequent as well as teachers, which will investi-

conferences with the citizens in the gate during the coming year such various towns to the end that they matters as "The Educational and Men-

would better understand his recommendations. The consequence was
that the people were ready for the report, saw the advantage of adopting
tank without advantage of adopting
tank without advantage of people were ready for the report, saw the advantage of adopting
tank without advantage of adopting tank with tank wi

port, saw the advantage of adopting it, and without undue delay acted accordingly. So bonds have already been voted and a special tax laid on all districts in the county.

The arrangement now to be effective calls for the consolidation of numerous towns, hitherto independent, into school districts and for the erection of thoroughly modern buildings in the central localities. A substan-

ber of supervisors and the whole efforts it is much too early to deter-school system will be reorganized on the 6-3-3 basis involving six years' that the whole movement has the en-

three years each in junior and senior high schools. Although work has already been started on some of the new worth of the assistance which teachers hulldings it will probably be these

buildings, it will probably be three can render and a disposition to leave

years before the complete program is to the teachers themselves the solution

attention of councils in other cities.

What good will come from all these

thusiastic support of the Nation's edu-

of strictly teaching problems. To a

Bureau of Education to discover but, in any event, it is the fact that

dents and teachers.

Meanwhile, the research department of the N. E. A. is already functioning. It has just brought out a bulletin of national interest entitled "Facts on the Cost of Public Education and What They Mean." This pamphlet differs from the customary Government reports in that it not only presents statistics but interprets at films calculated to offset school inthem. In fact it is declared to be the

How 2500 or more Philadelphia pupils are annually deprived of the education that is their due is described in the latest monthly report of the Children's Bureau of the Department of Labor. When their parents leave the city early each spring to work on the truck farms of New Jersey, they take their children with them. Often the migration be gins as early as February and continues until late October or November, so that the pupils affected lose schooling. In consequence nearly all of them are classed as retarded, some as much as five years. The attend-ance laws which ordinarily would operate to prevent this situation are children go from one state to another The hope is expressed that Pennsylvania and New Jersey may reach some agreement in the matter.

Educational Film Increasingly Popular

London, England
Special Correspondence
THE educational film has yet to b produced, Dr. Kimmins, chief in-spector of London's education department, has said recently. He is to investigate more fully the educational value of the cinema, and the effect upon the child from every point of view, and nobody is in a better position to judge of its merits than this sympathetic student of childhood. People are asking how long the child retains the impression of the

rapidly moving picture and what is its relative value to the stationary lantern slide. A successful lecturer on bird life has combined the two methods, giving for example clear pictures of birds sitting and standing on the in themselves. Is there any existent nest or the ground which the teacher can describe at length, and with movany vested interest in private or pub- ment of flight and the habits of the

to be usurped, isn't it simply that no one has yet come forward with a remedy, with a program for public support? It is essentially a problem in education.

As regards travel-films, there is no question of the interest they create in various countries. If the impression is fleeting, it lasts long enough to be a foundation for the work of a much loose thinking. In time of pres- in itself. Anything that stretches the sure the strength of the words the imagination, that sets forth a picture of some aspect of life other than that of grim streets and bricks and mortar must be a great factor for good, since even a fleeting impression is better "It has flowers and little hills. Why cation to rule. Democracy signifies I like it is because it makes you think dignity of a subject in the school cer-

them. In fact it is declared to be the fluence, but on the other hand we have constant aim of the department to conflict in no wise with the Federal Bureau of Education or the local associations but rather to supplement that work

Teaching of English in Great Britain

London, England Special Correspondence

THE revival of interest in a better use of the English language and a consequent acquaintance with its literature has little that is sentispontaneous growth of quite remarkable promise, springing up everywhere with its roots in the universi-ties and its branches in the elementary schools. Undoubtedly the report that was published on the teaching of English in England in 1921 has been a great stimulus. It is the col-lected evidence of men who know their subject. It is widely read and quoted and its significance was apparent in the recent outburst of educational conferences when so many speakers admitted its influence. English, say the compilers of the report, must be the starting point and foun-dation from which all the education of the nation springs, and a knowledge are inextricably connected.

have many difficulties to contend with partment, has said recently. He is in correcting speech. The children chairman of a committee now sitting often come into their care with a very poor use of language, but by storytelling and oral exercises they develop This kind of teaching should con-tinue. The report insists upon its value as the foundation upon which proficiency in the writing of Eng-

lish must be based. Fluency in writing, descriptions in the child's own words has supplanted the half-understood and stilted phrases of a former day and spelling, so the reader learns, develops as a result of plenty of careful reading. As to reading, "Children should from the beginning realize that the writing is speaking to them silently," or again t is pointed out how often reading is useless because the children are given books too difficult for their un

derstanding. They learn to read the word instead of the phrase to their great hindrance. Children should be trained to listen to and understand what is being read to them, and from that stage they begin to enjoy literature, recitation, and the acting of little parts. They

move toward free expression. In secondary schools the teaching of English has improved out of all recognition compared with the standard of 30 years ago. Debates, improvised school magazines, all have raised the

other side of the picture which is shown in the "Teaching of English in England." There is the kind of student who thinks poetry a mere waste of time, with nothing to contribute to the "social problem in which all his thoughts are centered."

Despite the evidence received on one hand as to the hostility of some of the workers to literature, it is recorded that the number of tutorial and other Workers' Educational Association classes studying literary subjects increases year by year. "All the witnesses emphasized the point that this interest could only spread in proportion as the artisan student was made where the merely academic teaching failed.

less it enlists the interested co-operation of parents, children, superintenognize their value to the children of Dean Becomes Retail Salesman in Interests of Higher Education

eation meet the demands of practical husiness, he did not nore over sets of books on the theory of business education. He hiked straight down to a department store to learn the problems of retail business first-hand. As dean of a university, he might have held bleasant conversation on the topic of those problems with the owner, the manager, and the department managers. But there was too much theory alone to that. There-

then of books. Dean Ayer says that as a delivery boy and as a retail salesman, espe-cially during the rush of Christmas shopping, he has learned more about the requirements for a successful college course in commerce than would have been possible through years of

theoretical study alone.

The college of engineering and commerce of which Dean Ayer is the head is operated on the co-operative plan in all departments except that of commerce. Two sections of engineering students alternate in the classroom and on field jobs that are allied with their scholastic subjects. It was to test certain theories that he had concerning a similar co-operative course in commerce to be instituted next year that the dean started at the bot of retail business.

A Dignified Study When asked whether his dignity had not suffered by reason of his drop from a high school education position to that of delivery boy, the dean

laughed.
"The most dignified of all studies and the one most essential to business success is that of the human race," he said. "I am making that study. And no job is beneath the dignity of a college man. If I were a youth with two strange initials behind my name and a diploma in my hand, and I wanted to get ahead financially, I should obtain a job where there were no college men. That would eliminate

the element of competition.
"Too many college men feel that restrict themselves to limited fields of work where only their kind are employed. Few retail salesmen have a college degree. Chefs who can neither read nor write are making \$15 a day. Those are two of the most fertile fields awaiting cultivation by the university graduate. Not only would he soon be the most efficient producer in those fields, but he would be promoted rapidly into an executive position. He would be a store manager for having worked as a salesman, and he would be a better hotel manager for having labored as a cook. I shall soon start students in retail selling.

Business Men's Suspicion Explained "I worked as a salesman in the than none at all. "The picture I like standard and power of spoken and interests of higher education. co-operative system of educati that he says, much as he loves tea ing, he would give it up entire rather than go back to the old plan. "The co-operative plan," he so "makes a student see what too moof them have been blind to, with a astrous results. It makes them astrous results. It makes them see that they are paid for what they can do, not for what they know."

To Get Knowlegde of Workings "And, too, an engineering studen is not sent out to labor on a construction job merely to learn how to mix concrete. He is sent out to get knowledge of workingmen, of organization, and of value of service-in short, of humanity and its business and its problems. He must also discover the fundamental economic truth that the rate of pay rises only with the in-crease of responsibility. "Sometimes a student comes back to

range all classes duffing slack trad- about engineering by swinging a pickabout engineering by swinging a pick-ax on the section gang? That is a common laborer's job.' My answer is: 'If you cannot show that you deserve more than a common laborer's job, you had best get out of college and stay on that job.' When he learns that he will he promoted as soon as he can show the language of the shop to the fore-man. You cannot sell anything to a man if he thinks that you are looking next man and that he deserves added down on him from a superior level.

"I have to sell this new course of mine to the business men of the city. As I see it, the first step in making a sale is to get the attention of the prospective buyer. The best way not to get that attention is to show the prospect by your first words that you do next man and that he deserves added responsibility, he has solved a problem essential to success in life. That problem have could have been solved for him by a college instructor in the classroom. Then, too, the danger of his ever becoming a 'Red' has vanished."

Dean Ayer says that before he con-sidered himself fitted to teach engineering, he worked on engineering projects as a laborer, as a timekeeper, one big retail store by riding as an as a foreman, as a field engineer, and assistant delivery boy on one of his as an office engineer. He felt the trucks. On one occasion, I found that a salesman had hurriedly scrib-bled an address on a package. Fifteen of Lafayette College.

The Search for a Title

NE of the minor difficulties besetting authors which is seldom thought of is the necessity of finding suitable names for their literary children. Whether the writer has made a book, an article, an essay, or a poem matters not at all—he must discover for it a title not too long, euphonious, and as perfectly fitting as choice of titles, but he has never immay be. To a man who writes much proved upon the name which he gave and whose ideas flow from him rapidly, to his first book, a slender volume this necessity of rummaging about which appeared when he was in his this necessity of rummaging about the probability of rummaging about for a label to accompany every bit of verbal baggage he sends into the world is frequently distressing. He knows that some men are more prospectively in titles than in material, that they have elittoring stores of heautithey have glittering stores of beauti-

ful labels with nothing to affix them to. He often sighs, therefore, for some division of literary labors, being quite content to write endlessly if some specialist in titles will name his works.

"One man," says Dr. Johnson, "excels at a plan or a title-page; another works away at the body, of the book, and a third is a dab at an index." Seldom do you find a single individual who is equally expert in all three. Dr. Johnson himself was seldom fortunate in his choice of titles, and he seems to have thought that all the his time. The naming of his first periodical gave him much trouble. sat down at night upon my bedside," says he, "and resolved that I would not go to sleep until I had found a title. The Rambler seemed the best that occurred, and so I took it." But he was never satisfied with this title, which indeed sat upon so indolent a man very awkwardly, and he did much better in calling his next adventure The Idler—a title which was somewhat bettered by The Lounger of Henry Mackenzie. Probably the best named magazine England has ever had was Addison's Spectator, for this title was perfectly suited to the nature of the contents and to the character of the chief editor. In the

4 4 4 It was in the year 1750 that Dr. world's books have been written, and it may be understood that the difficulties have not decreased. Moreover, at the same time that books halved." . . . have been multiplying. Our taste in of Elizabeth, almost to we must somehow contrive to book of his poems which appeared in 1576: "A Hundred Sundrie Flowres Bounde up in One Small Poesie; Gathered Partly in Translation in the Fyne and Outlandish Gardens of Euripides, Ovid, Petrarke, Ariosto, and Others; and Partly by Invention of our Fruitefull Orchardes in Englande; yielding Sundrie Sweet Savours of Readers." Yes, those were indeed "spacious days." Here we have a title, a description, a "puff," and a delightfully phrased compliment to possible purchasers, all in one. Considering all that it contains. Gascoigne's title is not too long. Here the author forestalls criticism by writing his own. Here is the far-off ancestor of the publisher's "blurb," which has been crowded off the title-page only to reappear on the paper jacket. to-day we must be content to do far less, for one's title must be short and more than five are too many.

4 4 4 The difficulties of title-finding are greatest in the case of a book of verse, for here there is seldom any chance of describing the contents and one must therefore find a phrase which will hint at the book's total effect or character, as he sees it. And in this field it does really seem that all the good choices have been used. A certain young poet of to-day spent some weeks in thought and inquiry among his literary friends trying to find a suitable name for his first book of poems. Finally he narrowed the choice down to two possibilities. He would call his book either "Magic Casements," after the marvelous pas-sage in Keats' "Ode to a Nightingale," or else "Stops of Various Quills," a phrase to be found at the end of Milton's "Lycidas." Either one of these two beautiful titles would have suited his book very well. He was greatly disappointed, therefore, to discover that both of them had been used several times by earlier writers.

Emily Dickinson in England

Her poetry is that of a recluse and mystic, but a recluse without any trace of the morbid or the inhuman United States there has been no mag- and a mystic only in the free sense in challenge than The Unpopular Reloved and studied nature in its largest as Mr. Conrad Aiken in his recent and smallest and possessed a wonder- anthology of Modern American Poets ful power of accurate description both for the thing seen or heard and for Johnson made up his mind that all good titles had been consumed. Since then by far the greater number of is mingled at times a quaint and quiet the good titles had been consumed. Since poetic moment, and with these there is mingled at times a quaint and quiet the good of the poetic moment. humour. Nothing could be more

We find her continually on the titles has been growing more exigent threshold of wonder, standing de-and finicking. Long titles, amounting tached in the sudden realization of the greatness of little things, the littables of contents, are no longer tleness of great, glimpsing for a motolerated. What the author of three ment a vast, elusive significance in centuries ago put into three hundred the common things of life. Like Blake, words we must somehow contrive to whom so often she recalls, she sees pack into three. Consider, for example, that gigantic title which heaven in a wild flower. That atti-George Gascoigne concocted for the tude is beautifully shown in a poem of four lines :-

> Where every hird is hold to go And bees abashless play, The foreigner before he knocks Must thrust the tears away."

yielding Sundrie Sweet Savours of little poem on the Oriole, she holds Tragicall, Comicall, and Morall Discourses, both Pleasant and Profitable from mind. The Oriole sings from to the Well-Smelling Noses of Learned the tree, but the reality of its song is only in the mind of the listener:

> "The fashion of the ear Attireth that it hear

So whether it be rune, Or whether it be none, Is of within:

'The tune is in the tree,' The sceptic showeth me; 'No, sir! In thee!'"

enough to be printed on the back of Emily Dickinson is difficult to critione's book. Three words are enough, cize. At her best she writes poems nd more than five are too many. Which are quite perfect. But on the How to pack into three or four or flawless poet, detached from date or five words an indication of the nature of a book's contents and at the same England spinster is perpetually intime to convey some notion of its truding with her charming, narrowly general character—there is the diffidated, demure yet humorous Quakerculty. Those few words must be at-tractive in themselves and should in thee!" of the Oriole poem . . . pique curiosity, but they must not be and again in such phrases as "You

stanzaic form she will suddenly dismay you by dropping out the rhyme so that the expected effect falls dead like a fiddlestring which suddenly slackens and goes flat. How far this is calculated it is difficult to say; the fact is that in the aggregate these imperfections come to seem things appropriate and attractive, just as an imperfection of accent or awk-wardness of gesture becomes an added

charm in a charming personality.

Emily Dickinson would sain enormously by careful selection. I have no doubt that a volume of selected poems would reveal the fact that her poetry

the Club. In the course of the evening I mentioned to the Members present my wish, and I knew it to be the wish of others, that a uniform dress [the French Academicians wear a green uniform] should be worn by Members of the Royal Academy at all their public meetings, which would give an impressive respectability to them, and in a becoming way distinguish them as a body. Nollekens said he would second my motion, and all appeared disposed to concur in it. I mentioned that formerly such an dea had been held by Sir Joshua Reynolds, &c., and that they proposed that gowns should be worn. I thought this would be carrying it too far, and that a blue coat, with some distinction of collar, cuff, and button would be sufficient, and would subject the Collects his spades, his mattocks, and Members to no real addition of expence, as the coat might be worn in common if the cape were taken off.

[Uniform dress was never worn by the Royal Academicians.] July 1—Mr. Trumbull, the Artist, is arrived from America, and comes in the capacity of secretary to Mr. [John] Jay the Ambassador, to settle the differences which have risen between the two countries lately .- Mr. Trumbull said everything seemed to promise fair for a settlement. He said the prudence of Mr. Washington prevented resolutions from being passed in America of such a nature as would have produced a war between the two countries.

He spoke of Tom Paine with averat last seen through to be a man disposed by nature to disturb the peace and order of society.

BOS TON, THURSDAY, FEBRUARY 1, 1923

EDITORIALS

THERE is reason to believe that as a result of the intelligent thought and free discussion which the people of Kansas are devoting to the

Child Welfare Bills in Kansas

proposed children's code, now taking form in bills introduced by the Children's Code Commission in the Legislature, there will be evolved constructive measures finally divested of much of what appear to be really objectionable features. The work of the commission has been painstaking and thorough, from the

standpoint of those who have volunteered to pursue it, but there seems to be a well-defined determination on the part of those who oppose some of the more objectionable features of the proposed code to present their case to the legislators at Topeka and to have a hand in shaping and revising the bill before it comes up for final passage.

As in many other states, so in Kansas, there is opposition to the effort to include in what might otherwise be regarded as helpful and constructive child welfare measures, provisions for the enforced medical training of school teachers and the compulsory medical examination of school children. The opposition is against that alleged autocracy and bureaucracy which take their worst forms in legislation, proposed or enacted, designed to insure the supervision of children, as well as adults, by the self-appointed arbiters of the welfare, from the standpoint of health, of individuals and communities.

And the people of Kansas are resentful, apparently, of the declared purpose of the medical doctors to use them as the subjects upon which experimental legislation may properly be tried. They are told that whereas all reforms come from Kansas, the opportunity to do pioneer work is offered in proposed laws compelling supervision of schools and school teachers by medical boards. It is reported that at a convention of doctors and surgeons held in Topeka some time ago it was stated that if Kansas would take the lead in passing such drastic laws the campaign of the medical men in the east-

ern states would be greatly aided. Now no people will hesitate when the opportunity is offered to lead in constructive legislation, but the doctors seem to have overlooked entirely the necessity, if it were possible, of convincing the voters of Kansas that the legislation proposed is actually constructive. The inclination is to believe that the children who attend the common schools today are not unlike those who attended them in the past. They are not in greater need of paternalistic supervision than were those of a former day who are now making and enforcing the laws in Kansas. They have the same rights as free-born American citizens to pursue the even tenor of their lives free from the interference of theorists and experimenters. They and their parents are able to look about them and see, unaided, some of the terrible results which compulsory vaccination and compulsory inoculation have left in their wake. They are, quite naturally, unable to see why there should be attached to what otherwise may be regarded as a constructive and helpful children's code, so called, provisions which deny to them that freedom of thought and action which is vouchsafed to the people of a

democracy. It is regrettable that it seems next to impossible, when truly constructive legislation is devised and recommended, to avoid the inclusion therein of provisions regarding which there never has been and never can be an undivided popular opinion. Constructive laws must, if they are to be helpful and effective, represent the best thought of the people in whose behalf they are enacted. And it is an indisputable fact that the growing tendency of popular thought is away from, and not toward, medical autocracy, no matter in what form it may appear. The effort is to make the schools the experimental laboratories of health officers and doctors paid out of the public treasury. In Kansas, as elsewhere, the effort is to multiply, by the number of counties and again by school districts, the total of these salaried or feed officials.

Existing public opinion is opposed to this campaign. By what means, then, are such laws enacted, nationally and by states? The movement is furthered by a clever and expensive campaign which arouses false fear in the thoughts of parents and lawmakers, and which attempts to arouse false pride in an unworthy leadership. Just as the medical men seek to establish a precedent in Kansas to be used in advancing their cause in the eastern states, they are now arraying, in an effort to induce Kansas to act, the states in which they have been successful in causing the enactment of some of their measures.

There is much good in the proposed children's code bill in Kansas, but its helpfulness lies not in including, but rather will be advanced by excluding, those questionable provisions which must be supported, if at all, by a divided public opinion.

THAT ancient book which, even among what have

Increasing

Demand

for the

Bible

been regarded as the more backward peoples of the present century, is regarded as the keystone of the civilization of the western world, is today the most sought after and the most generally read of any book ever published. It is encouraging that even with the reverses which civilization is believed to have suffered as a result of the recent war the demand for Bibles remains greater than can

be inet. Last year, according to official figures recently compiled, more than 30,000,000 Bibles were printed and distributed throughout the world. In its various translation . now numbering 770 different languages and dialead, it goes to the remotest places, where it finds those who have been told of it awaiting it with interest and hope. And yet there are millions, especially in the interior provinces of China, who are said to desire Bibles which even the generous provision made cannot yet

In the fifteenth century the first printed Bible came from the shop of Gutenberg. Its manufacture had required constant work for five years, from 1450 to 1455. This year the American Bible Society, which co-ordinates the Bible! lishing activities of some fifty Protestant denominations of the United States, has placed an order for 3,000,000 copies of the Bible, which are to be printed on a rotary press at the rate of 10,000 an hour, to be sold in Latin-American and other countries for one cent per copy. The total production for the year will far surpass the 30,000,000 record of the previous year, it is announced.

But even within the United States the demand for Bibles has been unprecedented since the war. It is a reasonable inference, no doubt, that in the camps and at the front many men who had not previously had access to the Bible learned to know and appreciate its helpfulness. A privilege which they had not formerly sought, or which had been denied, they have made their own, apparently, with a result that cannot fail to be beneficial. It is said also that within the last five years approximately 500,000 Mexicans, not heretofore readers of the Bible, have found their way into Texas. An effort is being made to put

into the hands of these people a copy of the Scriptures. It may be claimed by some that the Bible in the hands of an illiterate and ignorant person means nothing. But this claim cannot be substantiated. The history of civilization bears convincing testimony to the fact that all those who read and study the Bible are benefited in some degree. This proof is evidently accepted at its face value by those who, seeking better social and political conditions for themselves, turn instinctively and confidently to the Book which they recognize as the keystone to the best civilization of which they have knowledge.

THE bill pending in the United States Senate for the reorganization of the foreign service of the United States

Reforms . in the Foreign Service

deserves success. It has advantage in its proposition to effect complete interchangeability between the consular and the diplomatic services. Today such a simple system of co-operation does not exist, and there is no certainty that an experienced and competent consul can be shifted to the diplomatic service where his attainments would be of the utmost value to the Nation which he represents.

Moreover the suggestion that salaries be increased, at least to a point commensurate with the expenses of living in foreign capitals, is not made too soon. Diplomatic salaries are what they were before the World War had cut the purchasing price of money in two. When a former Ambassador to the Court of St. James's, like John W. Davis, testifies to the impossibility of defraying the expenses of his office for less than \$60,000 a year, the fact that the United States Government pays him a salary of \$17,500 can be looked upon as nothing short of an

imposition.

Both in the Foreign Service and in the Department of State the scale of salaries is such that in the former case only rich men, and in the latter only the sons of rich men can afford to hold office. This is a sorry showing for a democracy, and in the case of the State Department officials is probably responsible for the perfunctory and dilatory way in which the duties of the lesser officials there are too frequently performed. Congress has an opportunity now to correct these evils.

Among those in the United States who have become accustomed to the use of many modern appliances and

From

Oxcart

to

Automobile

conveniences which are regarded almost as necessities, are not a few who recall vividly the days when the oxcart was in common use as a means of transportation. Those of a later decade remember also the times when tallow candles were used where now electric lights are regarded as indispensable—the days when

kerosene lamps were almost unknown and when the cost of oil was next to prohibitive. Then within the easy recollection of many who are still active in the affairs of the world came the trolley cars, the telephone, and more recently the almost unbelievable strides in perfecting new modes of travel by

land, sea, and air. Unless it may be insisted that those things only are useful which need to be done to promote comfort, convenience, and harmonious living, it must appear that in this advance, undoubtedly beneficial and profitable, skill and adaptability in many of the useful arts and crafts are being lost. It seems but yesterday, almost, when the women of New England and their descendants in the then sparsely settled middle west spun yarns from virgin wool and wove them into rough flannels and cloths on their homemade looms. Hand-woven rag carpets and hand-braided rugs adorned the parlors and bedrooms, and homemade soap was used in lavatory and laundry. In many a farm and village home there was a simple kit of shoemaker's tools, used in repairing and sometimes in constructing footwear for family use. Often, also, there were carpenter and blacksmith tools, in the handling of which the farmers and villagers, fathers and sons, were

reasonably adept. But a great change has taken place. The trend in American affairs has been in the direction of specialization. The simple processes of manufacture and repair are being neglected and forgotten because it has been made possible and convenient to depend upon the factories, with their standardized outputs. Someone has observed that before many years, even if not already, the average man will not know how to harness a horse and hitch it to a wagon. But perhaps, as has been said, there

will be no need that he should know how to do these things. Perhaps it would be no more profitable for him to learn these accomplishments than it would be for the average woman of today to learn how to spin and weave, or how to "dip" candles or make soap.

Certainly it could not be insisted that the miller of the present should learn how to produce flour by the processes employed by the early American Indians. As we get farther and farther away from outgrown methods we realize their unimportance and uselessness: It is only as we fail to realize that we have been emancipated from former circumscribing and hindering customs, usages, and beliefs that we are inclined to look backward apprehensively and often longingly, possibly fearing to rely wholly upon the newer and better things.

THE apparently concerted effort in the legislative bodies of a number of the western states, including up to the

present time Wisconsin, Minnesota, Kansas, Arizona, and the two Dakotas, in addressing Washington in behalf of an early recognition of Mexico, is certainly interesting, and may be significant. Just what influence has led to action of this sort taken in common is not more apparent at present than what forces have led the Administra-

tion at Washington to delay so long the recognition which

Mexico seeks, and seemingly deserves.

Speaking

Up for

Mexico

Presumably these western legislatures were influenced by the spectacle of a Mexico which is more orderly than t has been since the time of the overthrow of Diaz. Even those American interests, which for their own purposes are desirous of keeping Mexico outside of the pale of recognition until concessions have been made to them, are unable to cite disorder and banditry as reasons for the refusal of recognition. Without ostentation or noise Obregon has restored order, and is rapidly building up again the industrial and political organization which will make Mexico truly great.

Report has it that the insistence of mercenary interests north of the Rio Grande, claiming certain rights in mineral deposits in Mexico which the Mexican Constitution would save for the benefit of the Mexican people, has caused the prolonged inaction of the Government of the United States in this matter. But most of the American people are not interested in oil, nor in coal, copper, or silver, however much a few fortunate concessionaires may be. They are interested materially in trade, and more than that they are rightly concerned that their Government should not set an example of trying to ostracize a neighbor, struggling upward toward a better organization of its state, simply because the mercenary interests of a comparatively few people may be menaced thereby. The action of these state legislatures seems to indicate a demand that the people, instead of the profiteers, be heard.

It is right and meet, someone has written, "that there should be an abundant utterance of good sound common-

places." One wonders, indeed, what the world would be like, if the commonplace, for which many affect contempt, were sud-denly obliterated. But if one perhaps more profitably wonders how much of interest he may find in a day's display of the commonplace; and if his query expands into sympathetic obser-

vation, he is likely to find excellent material upon which to whet his philosophy. No one, he may conclude, is so hopelessly commonplace that there may not be found in him a living spark of possible greatness of mind and heart; for quickened appreciation recognizes the deep-hidden and universal impulses of good, in

operation through the commonplace. One has only to walk abroad, with an open eye, to see everywhere the reflections of the ideal shining through the ordinary. Perhaps, if it be on a winter morning, even so lowly a thing as a cinder-strewn pavement may waken interest. Someone doubtless the janitor in this case had taken kindly thought for others; and those who passed that way walked more securely because of that modest, but friendly, service. Some of the passers-by, it may be, remembered to return a grateful thought. Perhaps on the next wind-swept corner, the interested observer sees a man, with hoary locks, slight, poorly clad, and bearing the marks of toil-filled years, scattering crumbs from a crumpled paper bag, before a flock of iridescent pigeons. Commonplace? Yes; and beautiful, too. He had remembered the weak; and he had shared. These little feathered things, helpless before the heavy snows, enjoyed a breakfast which, without such practical friendliness, might have been at least uncomfortably delayed. Farther down the street, attention is arrested by a friendly driver, pushing his motor truck against a heavy load of coal, and helping the slipping horses up an icy hill. Commonplace—until one gropes toward the real force, the kindly thinking, that moved the load,

Everywhere it is the same. Around the corner, on the street cars and ferries of the cities, or along the rural lanes, these little deeds, of sundry details in various settings, reveal the ideal, the tender, the fine, emerging from the commonplace. The analysis is encouraging. It is out of this common impulse toward the kindly and the good that righteous public opinion is formulated. Give it a reason for the larger act, a motive for the greater effort, and unified right thinking carries a community, and, eventually, must carry a nation, toward practical friendliness.

Then, when strong nations shall have put their power behind the weaker ones, and helped them up the hill of reconstruction into peace—as they must do, if they would retain their strength-will the deed be different, in essence, from the friendly strewing of cinders on icy paths to make one's neighbors' feet secure; or different from the humble sharing of scanty crumbs? Greater, it will be, infinitely greater in magnitude: in essence, not unlike. The world, happily, is a very commonplace world, after all.

Editorial Notes

GRANTED that January, 1923, was one of the wettest first months of a year New England ever knew, but this does not mean the prohibition law has proved a failure.

Now that K. B. Kingsbury, the president of the Standard Oil Company of California, has publicly declared that the inauguration of the eight-hour day by his company has proved an economic benefit, one may justifiably look for some other lines of industry, which still cling to the old standard through apprehension of economic loss, to reconsider taking this same step. Mr. Kingsbury declared at the Senate oil inquiry that the effect of the change from the twelve to the eight-hour day, which, by the way, was made by his company in 1917, had added to the efficiency, esprit de corps and the morale of the men. Judge Gary might profit by lending an ear to Mr. Kingsbury's evidence.

In Madison County, Iowa, stands a monument which is said to be the only one ever erected to a tree. It tells all who may read its inscription the story of the "Delicious" apple, the parent tree of which is still standing and bearing after fifty years of fruitfulness. The story is a romance of pomology, dating back into the 50's of last century, when a new settler in Iowa, Jesse Hiatt, planted an orehard. In the spring of 1872 Hiatt found, however, that a Bellflower seedling in the orchard had perished, but that from its root had sprung a shoot, which showed an unusual ruggedness and began to climb upward with surprising rapidity. A few years later the tree reached the producing point and by early fall was covered with fine apples of an aroma and flavor such as the owner had never found elsewhere. For some fifteen years thereafter the new tree bore annually, and, although the crop increased from season to season, its owner was unable to find a way to make its fruit known beyond his immediate neighborhood. Then he sent samples of the apples to an exhibition in Missouri, the manager of which was a practical nurseryman, who was attracted by them. The tag had become mislaid, however, and it was not until the next year, when Hiatt sent another consignment, that the nurseryman could identify their owner and make arrangements for taking some scions from the tree. Today the apple is known and grown in every quarter of the globe where the apple

IT SEEMS fitting that the profits accruing from the exhibition of the Mt. Everest film, which is now being shown in London and which is to be taken to the leading cities throughout England at the end of its London season, are to be devoted to a fund in aid of another attempt to reach the summit of this mountain. The film is interesting both from the point of view of its unique nature and because it represents phenomenal difficulties successfully overcome. Capt. J. B. L. Noel, the photographer, who is also delivering the lectures, found it necessary to carry his camera higher than a camera had ever been carried before, and in order to obtain some of his views, was compelled to stay at a height of over 23,000 feet as long as for four days at a time. The record of the expedition is extremely comprehensive, the spectator being carried along with it from start to finish. The ascent of the mountain is described in detail, among the views shown being those of the base camp and of the successive camps at heights of 16,000, 19,500, 21,000, 25,000, and 27,000 feet.

THOSE who have read the autobiography of Wagner will remember that he devotes many pages to discussing the opera "Liebesverbot," telling among other things the sorry results which attended its first presentation more than eighty years ago. It is not a matter of wonderment, therefore, that German music leaders are said to be determined to spare no pains to give the work the best rendition possible when it is reintroduced to the public, as it is announced will be the case shortly. The text of this opera, which, by the way, is based on Shakespeare's "Measure for Measure" and is regarded as a stepping stone to Wagner's opera "Rienzi," has long been available but of the music only fragments have been published. The reason of this is that it has lain among the Bavarian crown treasures since the winter of 1866, where it was presented by Wagner himself to his "royal friend," Ludwig II. When resuscitated it may no longer constitute a royal treasure, but it will, it is to be hoped, be finding a greater sphere of usefulness.

Notwithstanding the attacks which have been made of late on the Japanese Cabinet by Viscount Kato, the leader of the opposition party and the Premier's rival, Admiral Baron Kato, the Premier, and his Foreign Minister, Count Uchida, need have little apprehension that either their own country or the United States will disapprove of Japan's peace policy. Perhaps it is but natural that the Cabinet's friendly Chinese policy should have given rise to the charge that the Premier and his colleagues are showing weakness in their foreign relations, but the moral aspects of Japan's stand are of such a nature as to forbid the general acceptance of such a charge against the Ministry. Granted that Japan is one of the younger of the nations in the forefront of the world today, it is bidding fair to intrench itself firmly in its position by daring to do what the militaristic forces in and outside Japan may condemn.

WHEN J. E. Corrigan, the magistrate presiding in the Essex Market Court, New York City, at a hearing recently of an alleged liquor seller, declared that "half the cops are bootleggers and stealing whisky," he placed himself in a position where it would seem to be up to him to produce evidence to sustain his assertions. If he is correct, he is showing up a scandalous condition; if not correct, he is treading on dangerous ground. Can he substantiate his charges? If he cannot, he is doing grave injustice to the New York police force, and should

The Common-

place and the Ideal

be brought to an accounting.
